81. The radius of a cylinder is 2m. And its length is 20m. The area of an iron sheet constructed from the cylinder is:

108. Two positive numbers are such that the ratio of the square of the first to the cube of the second is to the ratio of the cube of the first to the square of the second as 1/20. Find the ratio of the 2 numbers.

109. Company A pays 5.5% on shares of Rs.100, and another pays at the rate of 3.5% On shares of Rs.10 each. If the price of the former be Rs.150.00 and of the later Rs.15.00, compare the rates of interest which the shares return to a purchaser.

36.67% and 86.37% 37.66% and 86.66% 67.36% and 87.36% None of these.

110. Factorise(x-y)³+(y-z)³-(x-z)³

$$3(x-y)(y-z)(x-z)$$
3(xyz)
$$3x-3y-3z$$
37.66% and 86.66% None of these.

Direction for questions 111 to 120: Study the table carefully and answer the questions that follow.

Type of companyà	No. of shares in mgt.	Limited cosultation on non critical issues	Full consultation in critical issues	Joint decision making	Full employee control
Profits					İ
10-50	30	10	3	20	2
50-100	20	5	17	10	1
100-150	15	7	21	40	1
150-200	4	8	20	40	2
>=200	5	10	7	30	0

^{*}Consultation means just taking employee opinion it is not involving employees in decission making.

111. The company making the most profits were the ones

who involved employees in decission making.

Consulted the employees.

Did not listen to employees.

Gave full control to employees.

112. The least number of companies showing profit in all the profit categories were

	not managed well.
C	Did not consult others.
С	Under full employee control.
С	Were under management control.
	. If the total amount of profit generated by all the companies in the 10 – 50 lacs gory is 13.00 crores then the average profit is
C	20 lacs.
\mathbf{C}	21 lacs.
\mathbf{C}	18 lacs.
С	22 lacs.
an a	. If company with joint decission making style in the 50-100 lacs profit category made everage profit of 80 lacs and company of limited consultation made average profit by all panies in joint decission making is in comparison,
С	less by Rs 350 lakhs.
\circ	Greater by Rs 3.5 crores.
C	Greater by Rs. 3.5 lakhs.
С	Greater by Rs. 350 crores.
lacs	. The average profit required to be made by companies with full consultation in the 7200 segment 50 that their total profit equals that made by companies of no share in mgmt with average profit of 280 lacs is
С	1400 lacs.
\mathbf{C}	280 lacs.
\circ	220 lacs.
С	200 lacs.
	. If you are appointed as a consultant and are to advice the atrategy for employee tions based on the above data you would , advice
0	full employee control. Joint decision making. No share in management.
C	Limited consultation.

I No share in mgr II Consultation in	e of profits from Rs 10 – 150 lacs, across categories nt and full employee control show a similar trend. critical issues shows an increasing trend. making shows an increasing trend.
I and II only. II and III only I and III only I II and III.	ly.
118. The maximu in case of which s	m jump in the number of companies from one category to the next occurs style.
	ultation. tion style. n making. the number of companies in one style of employee relation is exactly twice n the same category. The unique thing is that this occurs thrice in mat
	S.
Joint decision Full employed	management. n making.

Each question is followed by 2 statements

Mark (1) if statement I alone is suficient but statement II alone is not sufficient Mark (2) if statement II alone is sufficient but statement I alone is not sufficient Mark (3) if both statements I & II together are sufficient but neither statements

alone is sufficient

Mark (4) if each statement alone is sufficient

Mark (5) if statement I &II together are not sufficient.

	Directions for questions 151 to 160: Read carefully the passages given below and answer the questions that follow.									
Pass	sage	1								

How strange time is and how queer we are! Time has really changed and it has changed us

Yesterday we complained about time and trembled at its terrors. But today we have learned to love it and revere it, for now we understand its intents, its natural disposition, its secrets

too. It walked one step forward, unveiled its grace, alarmed us and hen elated us.

and its mysteries. Yesterday we were a toy in the hands of Destiny. But today Destiny has awakened from her intoxication to play and laugh and walk with us. We do not follow her but she follows us.

$\overline{}$			
<i>(</i>):	IDCT	-	nci
Ųι	ıest	IUI	ııs.

151.	The author is talking about
0 0	Time and how it has changed Our queerness Our fright None of the above.
152.	The author tries to say that along with time
0 0 0	We have become more frightened We have changed too We also walk with it None of the above
153.	When the author says that " Destiny follows us", he means
0 0 0	Destiny can take walks Destiny can play like us Destiny can sleep and awake like us We have conquered destiny
154.	The author throughout the passage sounds
0 0	sad pessimistic angry optimistic
155.	The passage has probably been written by a
c c	Novelist Philosopher or a poet

Botanist

Historian

Passage 2

As comprehensive socialism has diminished an opposing doctrine has emerged. This is privatisation. As a broad rule, privatisation ranks with socialism in irrelevance. There is a large area of economic activity in which the market is and should be unchallenged. Equally there is a large range of activities that increases with increasing economic activity where the services and functions of the state are either necessary or superior. Privatisation is not any better as a controlling guide to public action than is socialism. In both the cases the primary service of the doctrine is in providing escape from thought. In a good society there is in these matters one dominant rule: Decisions must be made on the social and economic merits of the case. This is not the age of doctrine. This is the age of practical judgement. Questions:

156. The author is

0 0 0	anti- socialism anti-privatisation calls for a balance between both None of the above
157.	The following statement is false
0 0	Socialism has disappeared Privatization cant be used in all areas Privatisation and socialism are opposing doctrines All of the above
158.	The piece was written in the
0 0	1960s 1970s 1990s 1950s
159.	In a good society, decisions are made based on
0	ad-hoc on cash flows

0	on economic and social merits of cases on economic value								
160	. In this passage the central idea is of the								
0 0 0	Theory of ideologies forms of governments Relevance of socialism even today Economic activities								
Study the statements and the two conclusions and state if:(A) Only conclusion I follows (B) Only conclusion II follows (C) Both conclusions I and II follow (D)Neither I or II follow

Directions for questions 171 to175

Each question below is followed by four arguments. Classify them into strong and weak

arguments.

Strong arguments must be both important and directly related to the question. Weak arguments may not be directly related or may be of minor importance

171. Movies should not be censored.

I No: Movies can contain obscenity and violence

II Yes: Censorship boards are overworked anyway.

III Yes: Censorship implies that a few people know what is good for the rest.

IV Yes. Movies are facing competition from television.

C	All strong	С	Only II weak	C	II and IV weak	С	All are weak				
172. Honesty is the best policy I Yes: To be honest pays in the long run II No: Honesty is often taken advantage of III No: Honesty is rarely appreciated IV Yes: An honest person has a clear conscience, and is a happier person											
С	I strong	С	All are strong	C	II is strong	С	III is strong				
I Yes II No III Y	173. The dowry system has to be legalized I Yes: All the dowry payers will be happy II No: Legislation will encourage the practice III Yes: Legalization will help institute checks and controls IV No: A shameful practice is best conducted secretly										
С	II and III strong	С	All are weak	C	IV is weak	С	II is weak				
I Yes II No III N	174. Money is the root of all evil I Yes: Money can drive men to murder and robbery II No: Money is mechanical III No: Only trees have roots IV Money signifies greed, which is the root of all evil										
С	II strong	С	All are weak	О	All are strong	C stro	I and IV are ng				
175. One day you have to quit working. Invest wisely today, and you won't stop spending I Yes: A wise investment today can give one an assured future income II No: It is not necessary that an investment today, however wise, can guarantee 'continued spending' in the future III Yes: Someday or the other, everybody stops working IV No: Investment is not an area that everybody is comfortable with.											
C stroi	I and II are ng	C stro	I II and III are ng	О	All are strong	С	All are weak				
	ections for quest		176 to 180	ncc	(I) or ludgemen	.+/1\	based on the				

Classify the statements as Fact(F), Inference(I), or Judgement(J), based on the definitions given below

FACT: Something that can be seen or heard, and is capable of being verified. INFERENCE: The statement that is drawn or concluded from a fact JUDGEMENT: Is an opinion, and implies approval or disapproval

176. a] This is a red book

b] All red books are unlucky

c] Red books are more attractive than blue ones

C	FFF	C	IJ	С	JFJ	C	FJJ				
177. a] The goat is sitting on the grass b] The grass is green c] Plastic is not a bio-degradable substance											
C	JJJ	C	FFF	С	FIJ	С	FFJ				
178. a] It is unimaginable b] God is great c] Politics is the last refuge of the criminal											
С	FFF	C	JIJ	С	JFF	С	JJJ				
179. a] Catches win matches b] Its just not cricket c] Spectators find one-day matches more interesting than test matches											
С	FFJ	C	JIJ	О	IJĬ	О	IIJ				
180. a] She was writing, seated on a table b] I love his mild nature c] The secretary gave a friendly smile											
С	JJJ	С	FJJ	С	FII	С	FFI				
Directions for questions 181 to 185 An argument is a statement meant to convince another person about your point of view An assertion is a point of view A counter-argument contains logic opposing the assertion Based on the above definitions, classify each of the given set of statements into I Assertion II Supporting reason III Counter argument IV Irrelevant argument											
181. a] They sold 850 chairs thereby getting a net profit of Rs 100,000 b] The IT department did the right thing when it acquired undervalued property nearly 10 years ago c] In the last 2 auctions, the department failed to sell any of the 53 chairs on view d] Even in an advertising blitz in the Gulf did not generate much revenue											
О	IV,IV,III,III	О	I, II,III,III	С	II, I, III, III	С	I, II, II, II				
182. a] It is difficult to be happy b] The symptoms of happiness are a source of happiness c] Happiness comes from a lack of want d] Unhappiness creates a lack of want											

I. II. II. II IV, I, II, II I, II, I, II I, II, IV, IV 183. a] A cheat

b] A liar

c] He is a twisted man

d] A friend to be relied on

II, II, I. III IV, IV, II, III II, III, I, IV I, I, II, II

184. a] The difference between good and evil is a fine dividing line

b] For example, is abortion right or wrong

c] Nature has not devised simplicity

d] Even a small leaf is of infinite complexity

CAT FULL LENGTH TEST 3: EXPLANATORY ANSWERS

1. [2] 2. [1] 3. [2] 4. [1] 5. [1] 6. [1] 7. [1] 8. [1] 9. [1] 10. [1] 11. [1] 12. [1] 13. [4] 14. [2] 15. [1] 16. [2] 17. [2] 18. [3] 19. [2] 20. [3] 27. [4] 21. [2] 22. [2] 23. [4] 24. [1] 25. [1] 26. [3] 28. [1] 29. [2] 30. [3] 31. [2] 32. [2] 33. [1] 34. [2] 35. [3] 36. [3] 37. [2] 38. [1] 39. [2] 40. [1] 47. [3] 41. [1] 42. [2] 43. [2] 44. [4] 45. [3] 46. [4] 48. [1] 49. [4] 50. [2] 51. [4] 52. [2] 53. [5] 54.[2] 55. [2] 56. [4] 57. [3] 58. [2] 59. [4] 60. [4] 61. A = 50pts., B = 40pts.

B = 50pts., C = 30pts.I.c.m. of 50 and 40 is 200 If B gets 200, A gets 250, C gets 150pts. If A gets 50, C gets 50*150/250 = 30pts. Hence[1]

62. Work done by x and y in 5 min = 5(10+15/150) = 5/6Remaining work = 1/6for doing 1/15 work, g takes 1 min. for doing 1/6 work,? $1/6*1*15 = 5/2 \min$ Hence [4]

```
63. Let time be t and speed be s.
Distance travelled = st = 2/3 s*(t+2)
t = 2/3 (t+2)
t = 4hrs.
Hence [2]
64. Let the speed be x.
When speed becomes 3/4th of the usual time, time becomes 4/3 i.e. 1/3rd more of the
usual
time.
1/3rd of usual time = 45min.
1/3rd of usual time taken to travel by = 45-15
1/3rd of usual time taken to travel AB = 10kms = 15min.
Usual time taken to travel 10km = 45 min
usual speed = 10*60/45 = 40/3 km/hr
Usual time taken to travel Ay = 45*3 = 135 \text{ min} = 2 \text{ hrs.}15\text{min}.
Distance = 40/3*135/60 = 90/3 = 30 \text{ km}
Total distance = 30+30 = 60km
Hence[1]
65. 12 \text{km/hr} = 12*100/60 = 200 \text{metres/min}
Distance of the cat from the rat = 50+200 = 250metres
Since both are moving in same direction, the rat gains 15-12 = 3km/hr i.e. 50 metres/min
Time required to overtake = 250/50 = 5 \text{ min}
Hence [1]
66. Let time be t hrs after 5a.m.
6.5t-5 = 30
6.5t = 35
t = 5 1/3 hrs.
The resoirvoir will fill at 5a.m.+5 hrs20min = 10.20a.m.
Hence[3]
67. speed down the river = 5km/hr
speed up the river = 5/(1 \ 1/3) = 3.75 \ \text{km/hr}
speed of the current = 1/2(5-3.75) = 0.625 \text{ km/hr}
Hence[1]
68.15m + 10b = 12m + 20b
3m = 10b
money earned by 10 \text{ boys} = \text{Rs.}100
Rs.100 = money earned by 3 men.
1 man should be paid 100/3 = Rs.33.33
Hence[2]
69. The cop gains 1/8-1/12 = 1/24 km/min = 41 2/3 m/min
To gain 100m, time, 100/(41 \ 2/3) = 2.4 \ min
The thief has gone ahead by 2.4*1/12*1000 = 200m
Hence [1]
70. If the sides are 5x, 6x and 7x
s = 18x/2 = 9x
Area = sqrt[s(s-a)(s-b)(s-c)] = 800
```

```
= sqrt[9x(9x-5x)(9x-6x)(9x-7x)] = 800
x = sqrt[800/sqrt(216)]
Hence [2]
71. s = a+b+c+d/2 = 50/2 = 25
Area of the quadrilateral = sqrt(10*13*15*12) = 30*sqrt(26)cm^2
Hence [1]
72. Area of 4 walls = perimeter*height
= 2(40+15)*h
= 110*h
Area = 7500/5 = 1500
1500 = 110h
h = 13.63
Hence[2]
73. Area = 1/2(sum of parallel sides * height)
= 1/2 * sum of sides *20
800 = 10*sum of parallel sides
80 = \text{sum of parallel sides}
x + (x+10) = 80
x = 35
other side = 45
Hence[1]
74. 450/200
200r = 900
r = 4.5 cm
Hence[4]
75 . density of steel is 1 i.e. iron is 8
weight of iron ball = weight of steel
volume of iron *8 = volume of steel *1
r^3*8 = 512
r^3 = 512/8 = 64
r = 4
diameter = 8
Hence[4]
76. sc = 2*22/7*r*h = 2*22/7*5*3 = 30*22/7 cm^2
volume = 22/7*r*r*h = 75*22/7 \text{ cm}^2
Hence [4]
77. New volume/old volume = (22/7*49*r*r*h)/(22/7*r*r*25*h) = 49/25
If old is 25, new is 49, then increase is 24
increase% = 24/25*100 = 96\%
Hence[2]
78. Length of water column = 6000/60
volume of water = 100*10*200 = 2*10^5m<sup>3</sup>
weight of water = 2*10^5*1000kgs
= 2*10^5 \text{ tons}
Hence[3]
```

```
79. Length of water column = 6000/60 = 100 \text{m/min}
volume of water = 100*10*200 = 2*10^{5}m<sup>3</sup>
Weight of water = 2*10^5*1000kgs
= 2*10^5 tons
Hence[3]
80. Total surface area of a cylinder = 2*22/7*r*h+2*22/7*r*r
= 2*22/7*7*10+2*22/7*7*7
= 440 + 308
= 748
Hence[1]
81. 2*22/7*r*h
= 2*22/7*2*20
= 80*22/7
Hence[2]
82. r+h = 40
2*22/7*r*r+2*22/7*r*h = 2*22/7*r(r+h)
2*22/7*r(r+h) = 1760
r = 7
h = 33
volume = 22/7*r*r*h = 22/7*7*7*33 = 5082 \text{ m}^3
Hence[3]
83. Let 3r,4r be the radii
Let 2h, 3h be the height.
Ratio of volumes = 1/2
Hence [1]
84. Let heights = h,2h
Let radii be r and R
22/7*r*r*h = 2*22/7*R*R*h
r*r = 2(R*R)
r/R = sqrt(2)/1
Hence[3]
85. Let correct time be x.
distance travelled in (x+10) min. at 20km/hr
Distance travelled in (x+2) at 30km/hr
(x+10)*20/60 = (x+2))*30/60
x = 14 \text{ min.}
Hence [3]
86. x/20-x/40 = 6
2x-x/40 = 6x = 240km
Hence[2]
87. Let speed be x.
360/x - 360/(x+20) = 3
360(x+20)-360x = 3x(x+20)
(x+60)(x-40)
```

```
x = 40
Hence [1]
88. Suppose the first distance is covered in x hours and 2nd distance in y hours.
4x + 6y = 30
6x + 4y = 32
Solving equations,
x = 3.6 \text{ hrs.}, y = 2.6 \text{ hrs.}
Total time = 6.2 \text{ hrs.}
Hence[2]
89. Distance covered by thief in 1hr. is 20km.
Now 10 km will be compensated in 1 hr.,
20 km will be compensated in 2 hrs.
So, he overtakes the thief at 4p.m.
Hence[3]
90. 1/2:1/3 = 3:2
If y takes 2 min., x takes 3 mins.
If y takes 24 min, x takes 24*3/2 = 36 min.
Hence[4]
91. -19,-17, -13,-11,-7
92. +1,-3
93. *2.5, *3.5, *4.5, *5.5, *6.5
94. +7,*7
95. Area of circle = 22/7*r*r = 22/7*21*21 = 1386
Area of triangle = 1/2 b*h
96. Pens
              Books
     20
                40
           30
      10
                 10
If the number of Pens and books are interchanged the same amount will be spent since the
ratio of pens to books is 1:1 the . Hence[2]
97.+88, -143
98. 7695/855=9, 69255/7695=9, .....5609655/623295=9
99. Weight of jar = w_1g
Weight of liquid = w_2-w
Weight of liquid(half filled with liquid) = w_2-w_1
Weight of liquid filled = 2(w_2-w_1)
Weight of jar + weight of liquid = w_1+2(w_2-w_1)
= 2w_2 - w_1
Hence [3]
```

100. In finding average speed, we use Harmonic mean.

```
H.M. = 1/\{1/3[1/x+1/2x+1/3x]\} = 18x/11 \text{ km/hr}.
Hence[4]
101. Draw XE to YZ
By pythagoras theorem,
(XE)^2 = (XY)^2 - (YE)^2 = (15)^2 - (9)^2 = 144
Let AB = CD = x.
AD/XE = AY/EY
x = 71/5
x^2 = 51.84
Hence [3]
102. Total money deposited = Rs.12*150 = Rs.1800
Interest on Rs.150 for 12 months = 150*12/12*6*1/100 = 9
Interest on Rs.150 for 11 months = 150*11/12*6*1/100 = 33/4
Interest on Rs.150 for 1 month = 150*1/12*6*1/100 = 3/4
Total interest = 9/1+33/4+3/4 = Rs.18
Total amount due = 1800+18 = Rs.1818
Hence [3]
103. Volume of core = 22/7*10/4*10/4*4cm<sup>3</sup>
Volume of core with paper = 22/7*d/4*d/4*4cm^3
Volume of paper alone = 22/7[d^2/16-10^2/16]*4cm^2
= 22/7*[d^2-100/4]cm^3
Also, volume of paper = 22/7*100*100*4*0.1/10cm<sup>3</sup>
= 100*22/7*400*0.1/10cm<sup>3</sup>
= 400 \text{cm}^3
400*22/7 = 22/7(d^2-100)/4
d^2 = sqrt(1700) = 41.2(approx)
Hence[1]
104. Total are = 4 area(triangleOAB)
= 4*1/2*10*1.5 = 30 \text{cm}^2
Hence[1]
105. floor space required = 100m^2
Air space required = 100*5.5m^3 = 550m^3
Height = 550/100 = 5.5m
Hence[1]
106. 64+64x^2 = 64(1+x^2)
25+25x^2 = 25(1+x^2)
sqrt(64+64x^2)-sqrt(25+25x^2) = 8sqrt(1+x^2)-5sqrt(1+x^2)
= 3 \operatorname{sart}(1.x^2)
Hence [1]
107. Measure of arc XYZ = XOY
= 2(XDY)
=2(XYP)
=2*50^{\circ} = 100^{\circ}
Hence [1]
```

```
(x^2/y^3)/(x^3/y^2) = 1/20
x^2/y^3*y^2/x^3 = 1/20
1/xy = 1/20
We cannot find x:y
Hence[4]
109. 1st investment = An investment of Rs.150 fetches a dividend of Rs.5.50
Rate = 5.50/150*100 = 36.67\%(approx)
2<sup>nd</sup> investment = An investment of Rs.15 fetches a dividend of Rs.0.35
Rate = 0.35/15*100 = 86.37\%(approx)
Hence[1]
110. If a+b+c = 0, then a^3+b^3+c^3 = 3abc
Putting x-y = a, y-z = b, x-z = c
Then a+b+c=0
The factors are 3(x-y)(y-z)(x-z)
Hence[1]
111. A.
112. C.
113. A. No of companies across different types of employee relations in 10 - 50 lacs
category is 65 Total profits generated by then is 13.00
Average profit = 13.0 / 65 * 10^7
= 130 / 65 * 10^6 = 20 lacs.
114. b. Avg profit of JDM com = 80 lacs
no. of cos = 10
Therefore Total profit = 800 lacs
Avg profit of Limited cons. Type firms = 90 lacs
No. of \cos = 5
Total profit = 450 lacs
Therefore JDM cos are > by 800 - 450 = 350 lacs = 3.5 crores.
115.d. Avg profit of no share in mgmt types = 280 lacs
total profits = 280 * 5 = 1400 lacs.
Total no of \cos in full consultations types = 7
Therefore Avg profit to be made = 1400 / 7 = 200 lacs.
( note it is a >- greater than or equal to sign for cust category or profits.)
116. b. The most number of companies are under this type of employee relations.
117.a.
118.d. In case of joint decision making from 50 - 100 lacs (10 cos) to 100 - 150 lacs (40
cos).
```

108. Let the two no.s be x and y.

- 119. c. Joint decision making / Full consultation = 40 / 20 = Limited consultation / No share in mgmt = 8 / 4.
- = No share in mgmt / full employee control = 4/2 = 2.
- 120. b. As seen above No share mgmt occurs in numerator in one case and in denominator in another.
- 121. Statement (2) alone is sufficient because 5 years ago his age should have been 11. (1 + 1 = 2). **Hence[2]**
- 122. From statement I Average speed = 2 uv /u + v = 2 * 20 * 15 / 20 + 15 **Hence[1]**
- 123. From statement (2) we get R. Hence[2]
- 124. Both the statements are not sufficient. **Hence[5]**
- 125. Since p q both are less than 1. **Hence[1]**
- 126. Both the statements do not give S.P.**Hence[5]**

127.
$$R = 180 - 100 = 80^{0}$$
 $Q = 40^{0}$ Hence[1]

- 128. Both are insufficient. **Hence[5]**
- 129. From both the statement, we arrive at-- A is to the North West of B. Hence[3]
- 130. Both are required. **Hence[3]**
- 131. Both the statements together give point P in the first or the second Quadrant.**Hence[5]**
- 132. Statement 2 alone is sufficient as the tangent PQ is perpendicular to QR. Hence[2]
- 133. From statement 1 --> (a)⁴ = a ⁴ From statement 2--> a ⁶ = 2^6 a = 6 **Hence[2]**

135. From statement 1-- Satish is older than Ganesh From statement 2 -- no conclusion can be drawn

Hence[1]

136. From statement 1 -- area = 30

Therefore each side = 30 / 4

From statement 2 -- length of diagonal is given. Both the statements by themselves satisfy the conditions. **Hence[4]**

137. From statement 1 -- 2 (22 /7)r = 10 (22 / 7)r = 5 2(22 / 7)r : (22 / 7) r^2 1:4

Hence[4]

- 138. We can derive the answer by combining both the statements. **Hence[3]**
- 139. From statement 1 -- we get the triangle PQR From statement 2 -- we go the length

Hence[3]

- 140. From both the statements a simultaneous equation can be formed. Hence[3]
- 141. From statement 1-- y 2 = xz y= sqrt xz From statement 2 -- y = sqrt x 2 y= x

but we cannot determine the value.

Hence[5]

142. From statement 1 -- we do not have the rate at which it emplies.

From statement 2-- we do not have the rate at which it fills.

Hence[3]

- 143. Since we do not know whether interest is simple or compound, we cannot calculate the ratio.**Hence[5]**
- 144. From statement 1 2 we get the speed of A. Hence[3]
- 145. Total surface area of a cylinder = 2(22/7) rh + 2(22/7) r 2 From both the statements we get the values of r h.

Hence[3]

146. From statement I we do not know the distance

From statement II speed of both the trains is equal. Hence Rajdhani will take 1 1/2 hours. Statement 2 alone is sufficient.

Hence[2]

147. From statement II we get the cost. Hence II is sufficient. Hence[2]

148. Statement II alone does not give the principal. Hence combining both statement we get

the rate of S.I. **Hence[3]**

- 149. From statement I we get the quantity not the cost. Hence both the statements are required.**Hence[3]**
- 150. From statement I we can find the time required by A B. **Hence[1]**

Passage- 1

151. a

152. b

153. d

154. d

155. b

Passage- 2

156. c

157. a

158. c

159. c

160. c

161[3] 170[1]	162[4]	163[4]	164[3]	165[4]	166[4]	167[4]	168[1]	169[4]
171[3] 180[2]	172[2]	173[1]	174[4]	175[1]	176[4]	177[2]	178[4]	179[3]
