

TS ECET - 2015

(FDH & B.Sc. (Mathematics))

Distribution of Marks

Objective type of Questions (Multiple Choice) only

1. For Engineering

S. No :	Subject	Weightage
1.	Mathematics	50 Marks
2.	Physics	25 Marks
3.	Chemistry	25 Marks
4.	Engineering Subjects (Separate for each Branch)	100 Marks
	Total	200 Marks

2. For Pharmacy

S. No :	Subject	Weightage
1.	Pharmaceutics	50 Marks
2.	Pharmaceutical Chemistry	50 Marks
3.	Pharmacognosy	50 Marks
4.	Pharmacology	50 Marks
	Total	200 Marks

3. For B.Sc – Mathematics

S. No :	Subject	Weightage
1.	Mathematics	100 Marks
2.	Analytical Ability	50 Marks
3.	Communicative English	50 Marks
	Total	200 Marks

Note: FDH: FOR DIPLOMA HOLDERS

ECET – 2015

List of Subjects

S. No :	Departments
1.	Mathematics (Common to FDH in Engg.)
2.	Physics (Common to FDH in Engg.)
3.	Chemistry (Common to FDH in Engg.)
4.	Electrical and Electronics Engineering
5.	Mechanical Engineering
6.	Civil Engineering
7.	Electronics and Communication Engineering
8.	Computer Science and Engineering
9.	Metallurgical Engineering
10	Chemical Engineering
11	Mining Engineering
12	Electronics and Instrumentation Engineering
13	Bio-Technology
14 .1	Pharmaceutics
14.2	Pharmaceutical Chemistry
14.3	Pharmacognosy
14.4.	Pharmacology
15.1.	B.Sc. (Mathematics)
15.2.	Analytical Ability
15.3.	English

ANNEXURE – I
FOR DIPLOMA HOLDERS

Syllabus for common entrance Test ECET [FDH & B.Sc (Mathematics)]-2015

1. MATHEMATICS (FDH in Engg Common Syllabus)

Unit-I: Matrices

Matrices of 3rd order: Types of matrices-Algebra of matrices-Transpose of a matrix-Symmetric, skew symmetric matrices-Minor, cofactor of an element-Determinant of a square matrix-Properties-Laplace's expansion-singular and non singular matrices- Adjoint and multiplicative inverse of a square matrix-System of linear equations in 3 variables-Solutions by Cramer's rule, Matrix inversion method,-Gauss-Jordan methods.

Partial Fractions: Resolving a given rational function into partial fractions.

Unit-II:

Trigonometry: Properties of Trigonometric functions – Ratios of Compound angles, multiple angles, sub multiple angles – Transformations of Products into sum or difference and vice versa – Simple trigonometric equations – Properties of triangles – Inverse Trigonometric functions.

Complex Numbers: Properties of Modulus, amplitude and conjugate of complex numbers, arithmetic operations on complex number—Modulus-Amplitude form (Polar form)-Euler form (exponential form)-Properties- De Moivre's Theorem and its applications.

Unit-III: Analytical Geometry

Circles-Equation of circle given center and radius, given ends of diameter-General equation- finding center and radius. Standard forms of equations of Parabola, Ellipse and Hyperbola – simple properties.

Unit-IV: Differentiation and its Applications

Functions and limits – Standard limits – Differentiation from the First Principles – Differentiation of sum, product, quotient of functions, function of function, trigonometric, inverse trigonometric, exponential, logarithmic, Hyperbolic functions, implicit, explicit and parametric functions – Derivative of a function with respect to another function-Second order derivatives –Geometrical applications of the derivative (angle between curves, tangent and normal) – Increasing and decreasing functions – Maxima and Minima (single variable functions) using second order derivative only – Derivative as rate measure -Errors and approximations - Partial Differentiation – Partial derivatives up to second order – Euler's theorem.

Unit-V: Integration and its Applications

Indefinite Integral – Standard forms – Integration by decomposition of the integrand of trigonometric, algebraic, exponential, logarithmic and Hyperbolic functions – Integration by substitution – Integration of reducible and irreducible quadratic factors – Integration by parts – Definite Integrals and properties, Definite Integral as the limit of a sum – Application of Integration to find areas under plane curves and volumes of Solids of revolution – Mean and RMS value.

Unit-VI: Differential Equations

Definition of a differential equation-order and degree of a differential equation- formation of differential equations-solution of differential equation of the type first order, first degree, variable-separable, homogeneous equations, exact, linear differential equation of the form $dy/dx + Py = Q$, Bernoulli's equation, nth order linear differential equation with constant coefficients both homogeneous and non-homogeneous and finding the Particular Integrals for The functions e^{ax} , x^m , $\sin ax$, $\cos ax$.

2. PHYSICS (FDH in Engg Common Syllabus)

Unit-I: Units and dimensions: Physical quantity-fundamental and derived physical quantities-units-fundamental and derived units-SI units-multiples and sub-multiples in SI units-advantages of SI units-dimensions and dimensional formulae-dimensionless quantities- applications and limitations of dimensional analysis-problems.

Unit-II: Elements of vectors:

Scalar and vector quantities-examples-graphical representation of a vector-types of vectors- addition and subtraction of vectors-triangle law-parallelogram law and its cases-polygon law- resolution of a vector-unit vectors (i, j, k)-dot product and cross product of two vectors- characteristics of dot and cross products-examples-problems.

Unit-III: Kinematics and Friction

Equations of motion-acceleration due to gravity-equations of motion under gravity- expressions for maximum height, time of ascent, time of descent, time of flight, velocity on reaching the point of projection in vertical motion--motion of a body projected from the top of a tower-projectile motion-examples-horizontal and oblique projections-expressions for maximum height, time of ascent, time of flight, horizontal range, magnitude and direction of resultant velocity in oblique and horizontal projections-problems. Friction- causes and types of friction-normal reaction-laws of friction-coefficients of friction- angle of friction-methods of reducing friction-advantages and disadvantages of friction-motion of a body over a rough horizontal surface, a smooth inclined plane and a rough inclined plane-problems.

Unit-IV: Work, Power and Energy

Work, power and energy-definitions and units-potential and kinetic energies-examples and expressions-work-energy theorem-law of conservation of energy-problems-renewable and non-renewable sources of energy (solar, wind, biogas, tidal, nuclear energies etc)

Unit-V: Simple harmonic motion and Sound

Definition-conditions of SHM-examples of SHM-expressions for displacement, velocity, acceleration, time period, frequency and phase of SHM-time period of a simple pendulum- seconds pendulum-problems. Sound-musical sound and noise-noise pollution-Effects and methods of control of Noise Pollution-Beats and echoe-problems-Doppler effect – Explanation, cases and Applications Acoustics of buildings-Reverberation-Sabines' formula- characteristics of a good building-problems.

Unit-VI: Heat and Thermodynamics

Expansion of gases-Boyle's law-Absolute scale of temperature-charle's laws-Ideal gas equation-Universal gas constant and its value-SI Units-problems-external work done by a gas-isothermal process-adiabatic process-first law of thermodynamics and its applications to isothermal process and adiabatic process-two specific heats of a gas-relation between C_p and C_v -problems-second law of thermodynamics and its applications.

Unit-VII: Modern physics

Photoelectric effect – explanation and its laws-applications of photoelectric effect (photocell) – critical angle and total internal reflection – optical fibers - principle, working , types and applications-concept of super conductivity – its properties and applications.

3. CHEMISTRY (FDH in Engg Common Syllabus)

Unit – I: Fundamentals of chemistry: Atomic structure: Introduction-Fundamental particles – Bohr's theory – Quantum numbers –Aufbau principle – Hund's rule – Pauli's exclusion principle- Electronic configurations of elements up to atomic number 20, shapes of **s, p, d** orbital's.

Chemical Bonding: Introduction – types of chemical bonds – Ionic bond taking example of NaCl and MgO –characteristics of ionic compounds and covalent bond taking example H₂, O₂, N₂, HCl characteristics of covalent compounds.

Unit-II: Solutions: Introduction solution classification of solutions, solute, solvent, concentration, mole concept,–Molarity,–Normality, equivalent weight using acids, bases and salts, numerical problems on Molarity and Normality.

Unit-III: Acids and Bases: Introduction – theories of acids and bases – Arrhenius, Bronsted –Lowry theory – Lewis acid base theory – Ionic product of water - PH and related numerical problems – buffers solutions – Applications.

Unit – IV: Principles of Metallurgy: Characteristics of metals and distinction between metals and non-metals. Definitions of metallurgy , ore, gangue, flux, slag –concentration of ore-hand picking, levigation, froth floatation – extraction of crude metal – roasting calcination, smelting – alloys –composition and uses of brass, German silver and nichrome

Unit-V: Electrochemistry: Conductors, insulators, electrolytes - Arrhenius theory of electrolytic dissociation – electrolysis – Faraday's laws of electrolysis- numerical problems – Galvanic cell – standard electrode potential – electro chemical series –emf and numerical problems on emf of a cell.

Unit –VI: Corrosion: Introduction - factors influencing corrosion - electrochemical theory of corrosion- composition cell, stress cell and concentration cells– rusting of iron and its mechanism – prevention of corrosion by (a) coating methods, (b) cathodic protection (sacrificial and impressive voltage methods).

Unit-VII: Water Technology: Introduction –soft and hard water – causes of hardness – types of hardness –disadvantages of hard water – degree of hardness, units and its relations– softening methods – permutit process – ion exchange process – qualities of drinking water – municipal treatment of water for drinking purpose.

Unit-VIII: Polymers: Introduction – polymerization – types of polymerization – addition , condensation and co- polymerization with examples – plastics – types of plastics – advantages of plastics over traditional materials – Disadvantages of using plastics ,thermo plastics and thermo setting plastics– differences between thermo plastics and thermo setting plastics- preparation and uses of the following plastics: 1. Polythene, 2. PVC, 3. Teflon, 4. Polystyrene, 5.Urea formaldehyde – Rubber – natural rubber – processing from latex –Vulcanization – Elastomers – Buna-s, Neoprene rubber and their uses.

Unit-IX: Fuels: Definition and classification of fuels based on physical state and occurrence – characteristics of good fuel - Extraction and Refining of petroleum - composition and uses of gaseous fuels. (a) Water gas, (b) producer gas, (c) natural gas, (d) coal gas, (e) bio gas, (f) acetylene.

Unit-X: Environmental Chemistry: Introduction – environment –understand the terms lithosphere, hydrosphere, atmosphere bio sphere, biotic component, energy component pollutant, receptor, sink, particulate, DO, BOD, Threshold limit value, COD- Air pollution - causes-Effects – acid rain, green house effect –ozone depletion – control of Air pollution – Water pollution – causes – effects – control measures.

4. ELECTRICAL & ELECTRONICS ENGINEERING

Unit -I: - Basic Electrical Engineering

Ohms and Kirchhoff's Laws, star/delta transformation, Network theorems, Power and Energy, Heating effects of Electric current, Magnetic effects, Electromagnetic Induction, Electrostatics, Types of Electrical Engineering Materials – Conducting, Semi-conducting, Magnetic, Insulating, Dielectric – Properties and Uses- Special purpose materials.

Unit -II: - D.C. Machines, Batteries & Measuring Instruments

D.C. Generators: Construction, Operation, types, EMF Equation, Windings, Characteristics, Efficiency and Parallel operation.

DC Motors: Principle of operation, Back EMF, Torque Equation, Types, armature reaction.

Characteristics, Starters, Speed Control, Losses, Efficiency and Testing, Batteries.

Measuring Instruments: Classification, Principle of Operation of moving Coil, Moving Iron, Dynamometer type, Induction type meters, Instrument Transformers, Induction type Energy meter, M.D. Indicator, Trivector Meter, PF meter, Frequency meter, Measurement of Resistance, Transducers and Sensors – Types, Thermistor, Thermocouple, Pressure Transducers and Strain gauges. Electronics and digital instruments.

Unit -III: - A.C. Circuits and Transformers:

A.C. Circuits: Fundamentals, Series and parallel R-L-C Circuits, Resonant circuits, Polyphase Circuits, Measurement of power by 2 Wattmeter's.

Transformer: Single-phase Transformer, Construction, Operation, Equivalent circuit, regulation, efficiency, Testing and Parallel operation, Accessories of Transformers and Cooling. Three-phase Transformers, Auto-Transformers.

Unit -IV: - A.C. Machines

Alternators: Construction, Operation, EMF equation, regulation, testing and parallel Operation.

Synchronous Motors: Operation and performance, effects of field excitation, 'V'-Curve and inverted 'V'- Curve, methods of Starting and uses. Hunting and its effects.

Three-Phase induction Motors: Construction, Principle of Operation, Torque Equation, Slip-torque characteristics, losses, efficiency, speed control, starters, double-cage motor.

Single-phase Motors:

Induction Motor: Types, Principle of operation, applications. Commutator motors: Types, Principle of operation and applications.

Unit -V:-Power System Generation & Protection

Generating Stations: Working, Components, Comparison of Thermal, Hydel, Nuclear and Gas Power stations. Pollution control, Combined Working, Power Stations auxiliaries, Characteristic Curves and Important Terms, types of tariffs, power factor correction and economy. Sources of energy.

Power Systems Protection: Circuit Breakers – Types, Principles of operation and uses, Current Limiting reactors, Relays – Classification, Principle of Operation of Induction type over current relay, Directional and Non directional relays, differential relays and distance relays, Protection of alternators, Transformers, Bus-bars, Transmission lines and feeders, Lightning arrestors, neutral grounding.

Unit -VI: - Transmission and Distribution

Transmission and distribution: Types of supply systems, Transmission line parameters, inductance and capacitance, performance of short and medium lines, regulation, Ferranti effect, Corona, Basic concepts of HVDC Transmission, advantages and disadvantages of HVDC Transmission. Components of lines, supports, conductor spacing, ground clearance and sag, insulators, voltage distribution across the string, string efficiency, methods of improving string efficiency. Earthing and layout of sub-stations. Cables – Classification, insulation resistance, specifications. Distribution – Radial and ring distributors, variation of load voltage.

Unit -VII: - Electric Traction

Electric Traction: Systems of Train Electrification, Speed-time Curves for different services, Schedule speed, Tractive Effort, Specific Energy Consumption, Traction system auxiliaries, Traction motor.

Unit -VIII: - Electrical Estimation

Electric Wiring: Tools, Wires, Types of wiring, Accessories, Lamp Circuits, Estimating and costing of domestic, industrial, power, irrigation pump sets, over head lines and 11KV Substations, Rural electrification, departmental tests, earthing, maintenance of electrical machines.

Unit -IX: - Basic Electronics and Digital Electronics

Semi-Conductor devices: N type & P type, Zener diode, PNP and NPN Transistors, Transistor configurations, characteristics, half and full wave rectifiers, Filters, Zener diode, regulation.

Special devices: UJT, FET, MOSFET, LED, SCR, Opto Coupler, Photo diode, Photo Transistor, CRO and Timers.

Amplifiers: Types, Principles of operation, Characteristics.

Oscillators: Types, operation and application of each.

Digital Electronics: Different numbering systems, inter conversions, Boolean Algebra, Logic families, performance of AND, OR, NOT, NOR, NAND, EX-OR gates, combinational Logic Circuits, sequential logic circuits, Registers and Memories, A/D and D/A converters, counters and flip-flops.

Unit -X: - Power Electronics and Micro Controller

Power Electronic Devices: Construction and working of SCR, GTO SCR, DIAC, TRIAC, IGBT, LASCR, Volt-ampere characteristics, Triggering of SCR using UJT, Protection.

Converters, AC regulators, Choppers, Inverters and Cycloconverters:

Types of Converters, working of AC regulators and Choppers. Types of inverters, Principles of working of Cycloconverters.

Speed Control of DC/AC motors and application of power devices:

Speed control of D.C. Shunt Motors by using converters and choppers, Speed control of Induction motor by using V/F Control. Switched mode power supplies (SMPS), UPS, offline and online UPS.

Micro Controllers: Architecture of 8051, instruction set of 8051, programming concepts, peripheral ICs – Function, features.

5. MECHANICAL ENGINEERING

Unit-I: Workshop Technology

Basis Workshop tools and Operations (carpentry, fitting and sheet metal) Metrology – linear, angular and surface measurement – comparators. Working and operations of lathe, Drilling, Shaper, slotter, Planner and milling machines – Capstan and turret lathes – copying lathes – surface finishing operations – Honing, lapping, super finishing, electro plating, metal spraying. Basic components of NC, CNC, and DNC machines – FMS and robotics, CNC part programming- Manual and Computer assisted.

Unit-II: Welding, Forging, Foundry and Conventions in drawing

Equipment used in arc and gas welding. Modern welding methods – Submerged arc, atomic, hydrogen, CO₂, and ultrasonic welding. Forging processes and tools - Cold and hot working processes. Pattern types – types of moldings and their properties - Defects in casting and welding. Conventional representations in machine drawing – production drawing – limits, fits & Tolerances – surface finish – Specifications of standard components like Bolts, Nuts, Bearings etc.

Unit-III: Engineering Materials, and Solid Mechanics

Mechanical properties of materials – Destructive and Non destructive testing of materials, Production of Iron and Steel – Iron Carbon equilibrium Diagram - Heat treatment processes – Plain Carbon and alloy steels – Ferrous and Non ferrous metals and alloys – Powder metallurgy. Resolution of Forces, Simple Machines, Simple stresses and strains – Shear force and bending moment diagrams – Strain energy – Deflection of beams.

Unit -IV: Design of Machine Elements

Belt, rope and chain drives – Velocity ratio, Belt tensions and centrifugal tension – Effect of belt thickness – Slip, lengths of open and cross belting – Power transmitted by belt, Simple, Compound, and epicyclic gear trains – Roller and Silent chains – Design of – Bolts, Nuts and Screws - Shafts, Keys, Couplings – Thin cylindrical Shells – Springs, cams, Flywheels and Governors.

Unit-V: Thermodynamics

Basic thermodynamics and Laws of Perfect gases, Thermodynamic processes, Air standard Cycles, fuels and combustion, I.C Engines - two and four stroke engines – Petrol and Diesel engines, Indicated and brake powers, Indicated and brake thermal efficiencies, Air Compressors, Gas turbines and Jet propulsion.

Unit -VI: Hydraulic Machines and Pneumatics

Properties of Fluids , Flow through pipes, Impact of Jets, Hydraulic turbines, Governing, Working principles and operation of reciprocating and centrifugal pumps, Hydraulic and pneumatic Circuit devices, air cylinders and Hydro Pneumatic Systems.

Unit -VII: Steam Boilers, Nozzlers and Turbines

Properties of Steam, Working, Performance of Boilers, Steam nozzles, Condition for maximum discharge – steam turbines – classification, Velocity diagrams for single stage impulse turbine and Reaction turbine.

Unit -VIII: Refrigeration

Methods of refrigeration, Cycles and Analysis - Air, Vapor Compression and vapor absorption refrigeration, refrigeration equipment.

Unit -IX: Industrial Management and Engineering

Principles and functions of management, organization structures, Production and materials management, financial management, entrepreneurial development, Marketing and sales, Principles of ISO 9000, Work study, Inspection and Statistical Quality Control, Estimation and Costing.

Unit -X: Automobile Engineering

Automobile Chassis construction, Function of transmission system, Gear boxes, single and multiplate clutches, Function and construction of propeller shaft, Universal Joint, Differential, semi and full floating rear axle, Front and Stub axles, wheel alignment and balancing, steering mechanisms. Braking system - weight transfer during braking, skidding, Hydraulic braking and air pressure braking systems.

6. CIVIL ENGINEERING

STRENGTH OF MATERIALS:

Unit -I: Simple stresses and strains- ductile materials-Mechanical properties of materials-Hooke's law-lateral strain-Poisson's ratio-Elastic constants and the relation between them-Composite sections-Resilience-Strain energy-Gradual and sudden loading- Shear force and Bending Moment Diagrams for cantilever, Simply supported, fixed, continuous and overhanging beams subjected to Point loads and UDL.

Unit -II: Theory of simple bending-assumptions-bending equation-bending stresses-Section Modulus-Shear stress distribution across various sections like rectangular, circular and I- sections-Torsion-solid and hollow circular shafts.

THEORY OF STRUCTURES:

Unit -III: Deflection of cantilevers and simply supported beams-Double Integration and Macaulay's methods-Mohr's theorems for slopes and deflections-calculation for propped cantilevers subjected to simple loading-Analysis of Fixed and Continuous beams of uniform section for simple loading without sinking of supports. Columns and struts-types-slenderness ratio- Euler's and Rankine's formulae for axial loading. Determination of forces in members of statically determinate, plane and pin-jointed trusses for dead loads only. Dams and retaining walls-conditions for stability-middle third rule-Rankine's formula for active earth pressure.

REINFORCED CONCRETE STRUCTURES:

Unit -IV: Grades of concrete, characteristic strength, Modulus of Elasticity-I.S. 456 -2000-Philosophy of Limit state design. Limit state of Strength and Serviceability, partial safety factor-design strength of materials and design loads-assumptions.

Analysis and Limit state design of rectangular beams-Singly, Doubly reinforced and T- beams. Shear in RCC beams, lintels and sunshades-Development length.

Slabs-analysis and limit state design of one-way and two-way slabs as per IS.456-2000. Torsion reinforcement. Design of continuous slabs and beams-Deflection check for Slabs and beams. Detailing of reinforcement in singly reinforced and doubly reinforced simply supported beams of rectangular sections and lintels, one way and two way slabs.

Unit -V: Columns: Codal provisions of I.S 456-2000-short and long columns-different shapes-design of short columns by limit state method-long columns- concept, effective length for different end conditions. Footings-Isolated column footings-one way shear and two way shear. Stairs-types, loads on stairs.

Working stress method of design: Basic principles, neutral axis, lever arm-Design and analysis of Singly reinforced simply supported rectangular beams. Comparison of Limit state and Working stress methods.

SURVEYING:

Unit -VI: Chain surveying- purpose and principle- errors and corrections- different operations in chain surveying- obstacles – methods of calculation of area. Compass Surveying- purpose and principle-bearings- traversing using prismatic compass- local attraction- errors. Levelling- definitions-component parts- errors- classification of levelling- contouring- characteristics and methods. Theodolite- principles and component parts- fundamental lines and relationship among them-adjustments of theodolite- measurement of horizontal and vertical angles- errors- traverse computations- bowditch and transit rule. Tacheometry- principle- stadia tacheometry- tangential tacheometry, Principle and uses of E.D.M, Electronic Theodolite, Total Station, Global positioning System – Importance, G.I.S – Use and applications in Civil Engineering, Curves-simple, circular , elements of simple curve, setting out of curves by chain & tape, single & double theodolite method.

HYDRAULICS:

Unit -VII: Fluid properties-specific weight –mass density-specific gravity-surface tension-capillarity-viscosity. Atmospheric pressure, gauge pressure and absolute pressure. Fluid pressure on plane surfaces-Centre of pressure, measurement of fluid pressure using piezometer and manometers. Types of flows-uniform, non uniform, steady, un steady, laminar and turbulent flows. Energies of liquid in motion-continuity equation. Bernoulli's theorem-Pitot tube-Venturimeter. Flow through small and large orifices, free orifices, submerged orifices, co-efficients of orifices-Cc, Cv and Cd. Flow through internal, external, convergent and divergent mouthpieces. Types of Notches-rectangular and triangular, flow over notches. Types of Weirs-sharp crested and broad crested-mathematical formulae for discharge-Francis and Bazin.

Unit -VIII: Flow through pipes-major and minor losses-Chezy's and Darcy's formulae for loss of head due to friction-HGL & TEL- flow through siphon pipes. Reynold's number for laminar and turbulent flows. Flow through open channels-rectangular and trapezoidal-chezy's formula for discharge-Kutter's and Manning's equation for Chezy's constants-Most economical sections. Centrifugal pumps without problems. Classification of Turbines- Kaplan, Francis and Pelton wheel without problems-use of Draft tube. Hydro-electrical installations-components and uses.

IRRIGATION ENGINEERING:

Unit -IX: Necessity of Irrigations - Perennial and inundation Irrigation , Flow and Lift Irrigation, Principal crops-kharif and rabi seasons-Duty, delta and base period. Methods of Irrigation-check flooding, basin flooding, contour bunding, furrow, sprinkler and drip Irrigations. Hydrology – Rainfall , types of Rain gauges, types of catchments-rainfall and runoff. Measurement of velocity of flow in streams-Ryve's and Dicken's formulae for computing maximum flood discharge. Classifications of Head works-component parts of diversion head works. Weirs and Barrages. Perculation and uplift pressures. Types of Reservoirs-dead storage, live storage and surcharge storage.

Unit -X: Storage Head works-different types of dams-rigid and non rigid dams- gravity dams-low and high dams. Elementary profile of a dam. Failures of gravity dams-drainage galleries. Ogee and siphon spillways. Earth dams— types, failures and precautions. Phreatic lines and drainage arrangements in earthen dams. Distribution works-classifications and alignment of canals-typical cross section of a canal-berm and balanced depth of cutting- canal lining. Lacey's silt theory. Cross drainage works –types and functions.

7. ELECTRONICS AND COMMUNICATION ENGINEERING

Unit –I:- ELECTRONIC DEVICES AND CIRCUITS: Semiconductor diodes – varactor diode – zener diode – Clippers and clampers-Transistors– FETs – UJT (characteristics only) – Power supplies – Rectifiers and Filters – HW, FW and Bridge type – RC , LC and CLC filters – Series and Shunt regulators, IC regulators – Transistor amplifiers – CE, CC and CB configurations – Biasing techniques-RC coupled – Transformer coupled amplifiers Differential amplifiers – Feedback, Power and Tuned amplifiers, Darlington pair amplifier – Operational amplifiers – characteristics and applications – RC, LC and Crystal oscillators – Astable , Bistable and Monostable Multivibrators using Transistors and 555 timers- Schmitt Trigger – Sweep circuits – Miller and Bootstrap circuits, VCO,PLL- Fabrication of ICs.

Unit –II:- CIRCUIT THEORY: Mesh current and Node voltage analysis – Cramer’s Rule – Network theorems – Thevenin’s, Norton’s, Maximum Power transfer, Superposition and Reciprocity theorems– Series and Parallel Resonance – Q- factor – Selectivity – Bandwidth- Coupled circuits, Transient analysis-RC and RL, Linear wave shaping circuits. Transmission Lines – Characteristic Impedance –Reflection Coefficient – SWR – Transmission Line losses and Impedance matching.

Unit –III:- ELECTRONIC MEASURING INSTRUMENTS:

Analog Instruments – Extension of range of Ammeter, Voltmeter and Ohmmeter – FET voltmeter – Differential voltmeter- Bridges-Wheatstone, Maxwell, Schering – Digital instruments – Ramp – Dual Slope integration – successive approximation – digital frequency meter-digital LCR meter- CRO – CRT – time base generator – deflection sensitivity – triggered sweep circuits – CRO applications, AF Oscillator – RF Signal generator – AF and RF Power meters – Q meter – Distortion Factor Meter – Digital IC tester, logic analyser, spectrum analyser-XY plotters.

Unit –IV:- INDUSTRIAL AND POWER ELECTRONICS: Thyristor family – SCR ,TRIAC, Power BJT –IGBT (characteristics, working principle and applications) – Converters – Single phase HW, FW fully controlled – Choppers – modes of operation – Inverters and Cycloconverters – Series and Parallel Inverters– PWM inverters,– Speed control of AC / DC motors using converters and choppers. – Off Line and On Line UPS – Opto electronic devices – LDR, Photo diode and transistor and Photo voltaic cell (characteristics and applications) – Transducers – LVDT – Strain Gauge, Thermocouple - Ultrasonics - Pulse echo flaw detector.

Unit –V: - COMMUNICATION SYSTEMS: Analog – Need for modulation – Types of modulation – AM , FM , PM – Modulation Index – Bandwidth – Power requirements – Transmitters – Low level and High level types – Receivers – Super heterodyne – AM and FM receivers – characteristics – Sensitivity , Selectivity , Fidelity – IMRR and choice of IF – Wave Propagation – Ground, Sky and Space waves – Properties. Digital – Pulse modulation – PCM, Delta modulation – Data codes – Synchronous and Asynchronous transmission – error detection and correction - digital modulation – ASK, FSK, PSK and QAM – generation and detection – Multiplexing – TDM , FDM – Multiple Access – TDMA, FDMA –PSTN, ISDN, EPABX, FAX– Internet Telephony.

Unit –VI:- ADVANCED COMMUNICATION SYSTEMS: Antennas– radiation resistance – beam width – polarization – directivity – efficiency – bandwidth – gain – front to back ratio – folded dipole – arrays – broadside – end fire – Yagi, Log periodic, Turnstile antennas – Parabolic reflectors – beam width, gain and applications. Wave Guides – Rectangular – Dominant mode – Phase and Group velocity – Cut off wavelength - working principle and applications of Magnetron, Klystron, TWT – Radar – range equation – Pulsed radars – indicators – duplexers – CW radars and MTI radars– ILS – Satellite communication – UP link and DOWN link frequencies – types of satellites – satellite on board – earth station systems – satellite applications– GPS – Fiber Optic communication – types of fibers – couplers, splices, connectors, switches, optical emitters and detectors – optical repeaters and amplifiers – Wave length Division multiplexing –DWDM – Mobile Communication – cellular concept – AMPS, GSM, CDMA, DECT and EDGE systems.

Unit –VII:- DIGITAL ELECTRONICS: Number systems – Logic gates – Boolean algebra – Adders and Subtractors, Multiplexers, Demultiplexers-Encoders-decoders, Comparators – Flip-flops– Registers and Counters – Memories – RAM, ROM, Flash ROM, NVROM, Cache Memory, Virtual

Memory, Associative Memory – D/A converters – binary weighted – R-2R Ladder, A/D Converter - Counter and Successive approximation types.

Unit –VIII:- MICROCONTROLLERS AND MICROPROCESSORS: 8051 Architecture – Instruction Set – subroutines – use of input and output machine related statements – time delay programme – assembler directives - peripheral ICs – 8251, 8255, and 8257– 8086 Architecture – Instruction Set – Features of 80286, 80386,80486 and Pentium.

Unit –IX:- AUDIO VIDEO SYSTEMS: Recording and Reproduction of Sound using Magnetic and Optical methods – Television Picture elements – scanning and synchronization – blanking and interlacing – composite video signal, flicker, CCIR standards – camera tubes – Image Orthicon – Silicon Diode array – TV receivers – Tuner, IF, Sync separator , deflection circuits , EHT and sound circuits – Color TV – Additive and subtractive mixing – Color Picture tubes – degaussing – types of color TV systems – NTSC, PAL and SECAM – PAL system processing – DTH system– Cable TV– HDTV– Basics of Remote control.

Unit –X:- DATA COMMUNICATIONS AND COMPUTER NETWORKS: Transmission Media – twisted pair – UTP –STP –Coaxial cable – Optical fiber – comparison – Shannon Capacity theorem – Network Topologies – BUS, STAR , RING – switching – Packet and Circuit switching – OSI 7-layer model and functions – CSMA and token ring – properties and operations – Wireless LAN – Blue tooth technology – WAN architecture – Packet transmission – ARPA Net – ISP and ISDN architectures – WAN Protocols – TCP / IP features and comparison –Ports and Sockets – Domain Name System – Email – File transfer protocol – Proxy server and Web server architecture – Web Browser Architecture.

8. COMPUTER SCIENCE AND ENGINEERING

Unit-I:- Digital Electronics: Logic Families: TTL, ECL, MOS – Logic gates AND,OR,NOT,NOR,NAND and XOR – Boolean Expressions – K-map –Combinational Circuits – Flip-flops – registers – Counters – decoders, multiplexers and semiconductor memories.

Unit –II:- Microprocessors: 8086 microprocessor – architecture, segmentation concepts – register organization – addressing modes – instruction set – preliminary features of 80286, 80386 and 80486

Unit –III: - Computer Organization: Functional blocks of CPU – Fixed point, floating point number representations –instructions – addressing modes – stored program concept – instruction execution – memory hierarchy – virtual memory, associative memory – cache memory – I/O organization – methods of data transfer – programmed I/O, DMA, Interrupts – IOP.

Unit –VI: - C and Data Structures: Data types, storage classes, operators and expressions – control statements – functions, parameter passing – arrays and pointers, structures, unions – type definitions – pre processor statements – files – Data Structures – Linked Lists – queues and stacks – trees – sorting : bubble, selection , quick and merge sorts -Searching : linear and binary search techniques.

Unit –V:- Computer Networks: OSI reference model, TCP/IP reference model –Network topologies : Bus, Ring, Star, Mesh, Hybrid – LAN components – Coaxial, twisted pair, optical fiber cables and connectors – repeaters, hubs, switches, NIC – Ethernet, token bus, token ring, inter network packet exchange/sequenced packet exchange – HTTP, FTP, SMTP, Telnet – TCP/IP addressing scheme – IP address classes - sub netting.

Unit –VI: - Operating Systems: Operating system concepts, functions, types, system calls – process management – CPU scheduling algorithms – deadlocks – memory management – overlays, paging, segmentation, virtual memory, page replacement algorithms – disk scheduling- free space management – allocation methods – disk scheduling algorithms.

Unit –VII: - RDBMS: Need of database systems, data independence, Data models, E-R model – structure of relational database – normal Forms : 1st, 2nd, 3rd and BCNF – SQL – data types, operators, DDL and DML commands – views, sequences, synonyms, indexes and clusters – PL/SQL – data types, control structures, cursor management, exceptions, functions, procedures and packages.

Unit –VIII:- Object Oriented Programming Through C++: Concept of OOPs – classes and objects – Constructors and destructors – arrays, pointers, references, strings – function overloading and operator overloading – inheritance – virtual functions – friend functions –this pointer – i/o manipulators – file and i/o functions.

Unit –IX: - Java Programming: Java – data types, variables, operators, arrays – Classes and objects – methods – constructors – overloading –inheritance - Visibility mode – packages – Interfaces – multithreading – exception handling – applets.

Unit –X:- Internet Programming : Internet fundamentals – HTML, tags, attributes, formatting text – VB script –data types, operators – control structures – procedures and functions – ASP objects and components – use of ASP with database.

9. METALLURGICAL ENGINEERING

Unit –I: - ELEMENTARY PRINCIPLES OF METALLURGY: Introduction to metallurgy – ores & ore dressing, Methods of ore sampling – Comminution – sizing- concentration. Principles and processes of Pyro, hydro and electrometallurgy –Minerals of commercially important metals.

Unit–II:- FUELS, REFRACTORIES AND PYROMETRY: Classification of solid, liquid and gaseous fuels – Testing and properties of important fuels-Manufacture and characteristics of Metallurgical Coke - Combustion of fuels – Properties, manufacture and selection of Refractories, Principles and operation of important pyrometers- Heat transfer.

Unit–III:- METALLURGICAL THERMODYNAMICS: Introduction and applications of thermodynamics –First Law of thermodynamics- Thermo chemistry - Second Law of thermodynamics - Ellingham diagrams - Fugacity, activity and equilibrium constant -Phase equilibria – Solutions. Fundamentals of Reaction Kinetics.

Unit–IV:- PHYSICAL METALLURGY: Structure of Metals and Alloys – Solidification - Diffusion – Binary thermal equilibrium diagrams-Iron-carbon diagram- important non-ferrous binary alloy systems – Microscopic and macroscopic examination of metals and alloys.

Unit –V: - HEAT TREATMENT TECHNOLOGY: Heat treatment of plain carbon steels - Annealing, Normalizing, Hardening and tempering of steels – TTT diagrams – Hardenability - Grain size, Quenching media. Alloy steels & Effect of alloying elements on plain carbon steels – Stainless steels, tool steels – Case hardening techniques. Special heat treatment techniques such as Austempering, Martempering, sub-zero treatment - Heat treatment of Non-ferrous metals and alloys – Age hardening - Heat Treatment Furnaces and Furnace atmospheres – Heat treatment defects.

Unit –VI:- FERROUS EXTRACTIVE METALLURGY: Iron ores and preparation of iron ores - Blast furnace plant and equipment – blast furnace reactions - irregularities and recent trends - sponge iron & methods of production – Ferroalloys – types and applications. Steel making by Bessemer, LD, Kaldo, Oxygen Lime (LDAC) process, Open hearth and Electric furnaces – New techniques in steel making – Vacuum treatment of liquid steel - Ingot defects - Continuous casting.

Unit –VII: - NON-FERROUS EXTRACTIVE METALLURGY: Extraction of copper – Pyro and hydrometallurgical methods & refining - Aluminum- Extraction, Anode effect, Refining - Zinc and Lead - Pyro and hydrometallurgical extraction and refining. Extraction of Magnesium by Dows and pigeonne processes. Extraction of Titanium by Kroll's process - Refining of Titanium by Van Arkel's process-Extraction of Thorium and Zirconium.

Unit–VIII: - MATERIAL TESTING: Tension test. Stress- strain relationships, necking phenomenon. Hardness tests-principles and types. Impact testing-Notched bar impact tests. Transition temperature. Fatigue, Stress cycles, S-N diagram, Factors affecting Fatigue. Creep testing - creep curve, Stress - rupture test. Non-destructive testing- Principles, methods and applications of liquid penetrant, Radiography, Ultrasonic Magnetic particle and Eddy current test.

Unit –IX: - MECHANICAL METALLURGY: Plastic deformation of metals – lattice defects – Slip and Twinning - CRSS –Strengthening mechanisms. Strain hardening - Hot and Cold working - Recovery, recrystallisation and grain growth. Metal forming processes-Rolling, Forging, Extrusion & Sheet metal forming processes and defects – Thermo mechanical treatments – isoforming and ausforming. Powder metallurgy. Methods of powder production, Characterization, Compaction, Sintering and applications of Powder Metallurgy.

Unit –X:- FOUNDRY TECHNOLOGY: Patterns: Types, materials and pattern allowances, Moulding Sands - properties and Testing, Moulding Processes and equipment: Sand casting, Die casting, Shell moulding, Centrifugal casting, Investment casting and CO₂ process-Cores: Types of Cores and properties, pouring and feeding of castings. Cast irons – types, Melting of cast irons - Grey, S.G and

Malleable iron. Aluminum, Copper and Steel Foundry practices. Defects in Castings. Cleaning & Salvage of Castings.

Unit –XI:- WELDING TECHNOLOGY: Basic concepts of Welding - Principles and processes of various welding techniques such as Oxy-acetylene, Shield Arc welding, Inert gas welding- TIG and MIG - Special welding processes- Plasma, resistance, electro slag, electron beam, thermit and Laser. Soldering and brazing– Weld ability, factors affecting weld ability – Heat affected zone, Microstructure – Post weld treatments –Welding defects –Inspection and testing.

10. CHEMICAL ENGINEERING

Unit –I:- Material technology: Mechanical properties of metals and Testing of materials – thermal equilibrium diagram- Production of Iron-plain carbon steels, alloy steels – Non-ferrous metals & their alloys- Aluminium, copper, nickel, lead, tin, zinc-Miscellaneous materials – Glass, carbon, graphite, rubber, elastomers, fibreglass and FRP etc.. – Corrosion- causes, types, methods of prevention.

Unit –II:- Chemical process principles: Determination of molarity, molality & normality, analysis of solids, liquids and gases on dry and wet basis - Daltons law , ideal gas equation of state , vapor pressure boiling point and freezing point , elevation of boiling point and depression of freezing point-uses, Bypassing ,Recycling & purge streams – uses , limiting component , excess reactant , percentage conversion & yield and degree of completion - Material balances with and without chemical reactions-Law of conservation of energy , heat of reaction , heat of formation , and heat of combustion – related problems , gross and net calorific values , theoretical air and excess air calculations – Proximate and ultimate analysis.

Unit –III:- Organic Chemical Technology: Coal chemicals, coking of coal, coal tar distillation, petroleum refining-atmospheric distillation and vacuum distillation, fluid catalytic cracking, catalytic reforming, petrochemicals from methane and ethylene - Pulp and paper industry, Kraft process - Oils, fats and soaps -sugar & fermentation – synthetic fibres - rubber industries.

Unit –IV:- Inorganic Chemical Technology: Water-sources, impurities-treatment-dissolved solids-ion exchange process and Reverse Osmosis (RO) process - Manufacture of chemicals like, soda ash, ammonia, Urea, nitric acid, sulphuric acid, phosphoric acid, Super Phosphate and industrial Gases (O₂,N₂, H₂, CO₂ and acetylene) - Paints, pigments and varnishes, graphite and silicon carbide and cement.

Unit –V:- Fluid mechanics: Flow of incompressible fluids, Newtonian and non-Newtonian fluids, viscosity, Bernoulli's theorem, friction losses, flow meters, different types of pumps for transportation of fluids, Flow past immersed bodies, fluidization - packed bed and fluidized bed.

Unit –VI:- Heat transfer: Conduction – mechanisms of heat flow – Fourier's law, thermal conductivity, steady state conduction- compound resistances in series, heat flow through a cylinder – related problems. Convection – heat flow in fluids- rate of heat transfer, average temperature of fluid stream– Overall heat transfer coefficient – LMTD – Fouling factors – Heat transfer to fluids with and without phase change. Radiation – fundamentals, emission of radiation, black body radiation, laws of black body radiation – radiation between surfaces.- Heat Exchange Equipment – types of heat exchange equipment, counter current and parallel current flows.- Evaporation – liquid characteristics and important properties, types of evaporators, condensers, ejectors- evaporator economy- single and multiple effect –related problems.

Unit –VII: - Mechanical unit operations: Size reduction methods, laws of size reduction- crushers and grinders. different types of equipments for mixing dry powders, differential and cumulative screen analysis, screen effectiveness, average particle size, storage of solids, conveyers, froth floatation, electrostatic precipitator, scrubber, cyclone separators, filtration, sedimentation.

Unit –VIII:- Thermodynamics and Reaction Engineering: 1st law of Thermodynamics, PVT relationships for gases, 2nd law of Thermodynamics, refrigeration and liquefaction, determination of equilibrium constant and conversion, Temperature effect on reactions – Arrhenius equation. Basic equations & working of batch, tubular and stirred tank reactors, catalysis.

Unit –IX: - Mass Transfer: Principles of diffusion, inter phase mass transfer, distillation, absorption and adsorption, humidification, membrane separation, extraction and leaching, drying, crystallization.

Unit –X:- Instrumentation & process control: Static and dynamic characteristics of an instrument-step input, linear input, sinusoidal inputs, measurement of temperature, pressure, vacuum, liquid levels and composition. Process instrumentation & Instrumentation diagrams - Process control, different types of controllers, concepts of DCS (Distributive control system).

Unit –XI:- Environmental Studies and Pollution Control Engineering: Scope and importance of environmental studies, Effect of human being on environment and vice- versa - Water pollution, types, classification, treatment methods - Air pollution, types, classification, analysis, control methods - Solid waste management, sources, classification, disposal - Pollution control in sugar, fertilizer & petroleum industries - Legal aspects.

Unit –XII:- Energy Technology & Plant Operation: Classification of energy sources-Solid, Liquid, and Gaseous fuels – Combustion principles, Refractories, Furnaces - Blast Furnace, LD Converter - (Nuclear Energy, Solar Energy, Wind Energy and Bio-Energy – Energy Conservation - Industrial Hazards and Prevention -Safety and first Aid.

11. MINING ENGINEERING

Unit –I: - ELEMENTS OF MINING:

Definitions of Terms, Mineral based industries, Mining operations, modes of entry, shaft, incline, adit-applicable conditions, Mining Methods used in coal and Non coal mining, Classification of the mineral deposits based on various factors, classification of coal seams based on various factors. Classification of methods of working-U/G Coal, OCM & Metal Mining, Bore(Drill) holes uses, classification and various tools used in boring(Drilling), feed mechanism, core recovery, deviation of boreholes. Explosives- Characteristics, classification, composition, properties, different explosives used in U/G, OCM, Metal and coal mines, selection of explosives and initiation of explosives, Detonators-types, Blasting practice in Mines- terms, tools, sequence of shot firing, drill patterns types, misfires, blown out shots, sockets, treatment of misfires, accidents due to explosives and shot firing, preventive measures, Mine Gases- types, physical and chemical properties, physiological effects and occurrence. Shaft sinking methods – sinking through normal strata, Special methods of shaft sinking pilling, drop shaft method, cementation, freezing method. Temporary, permanent lining of shafts. Support- Necessity, classifications, materials used for supports, supports employed in Bord, pillar and long wall, Mechanized long wall, Continuous mining panel, metal mining methods supporting systems in Mining, permanent, semi permanent, face supports their applicability and withdrawal of supports.

Unit –II: - MINING GEOLOGY:

Definition of the term Geology, scope, uses of geology in Mining field, Branches of geology, Age of the earth, origin of the earth-Nebular hypothesis of Kant and Laplace, Physical Geology, internal structure of earth, weathering, erosion, denudation, Attrition, Abrasion, Earthquakes, its propagation, intensity, causes and effects of earthquakes. Volcanoes and its classification, Mineralogy-Physical characteristics of minerals, important mineral families, industrial uses of important minerals; Occurrence and distribution in A.P and India. Petrology- Classification of Rocks and its characteristics, structures and textures. Structural Geology, folds ,faults, joints, unconformities. Geological time scale, major stratigraphical divisions of India, Physio-graphic divisions of India, Economic Geology- Terms, processes of mineralization and important economic minerals formed by these processes. Geological prospecting- objectives, guide lines for location of mineral deposits in fields, methods of prospecting. GIS and Remote sensing concepts. Coal Geology-Periods of coal formation, stages of coal formation, origin of coal seams, drift and insitu theories, structural features of coal seams, distribution of coal seam in world, India, and Telangana state. Petroleum Geology-Origin, migrations, and accumulations ,distribution of oil fields in world and India

Unit –III: - METHODS OF WORKING COAL:

Methods of working Bord, pillar and long wall - development, opening of districts, different methods of development systems with machines and continuous miners, depillaring. Long wall mining-Long wall advancing, long wall retreating, applicability, merits, demerits, limitations. Special methods of working like inclined slicing, horizontal slicing, blasting gallery, horizon mining. Stowing practice in mines, subsidence-subsidence survey, its effects and remedial measures- Opencast-manual and mechanized, Heavily mechanized ,Opencast mines with different combination of HEMMs and modern trends of open cast coal methods-with inpit crushing Technology, surface miners, BWE, Spreaders, High wall mining. Environmental and ecology relative to opencast mining, pollutions of air and remedial measures.

Unit –IV: - METHODS OF WORKING METAL:

Definitions: Development of mineral deposits, levels, sublevels, Winzes and Raises etc Handling waste rock and mineral, Drilling and blasting, arrangement for loading, conventional and mechanized methods of raising ,TBM, various stopping methods, classification selection of stopping methods, breast, under hand, overhand, field, shrinkage cut and fill, sublevel, Block caving, top slicing, VCR, Ring hole drill stoping methods Sampling-Classification of sampling methods, reduction of samples, salting preventive measures, Assaying, Assaying plans, valuation of mines, problems associated with deep mining. Rock mechanics- concepts ground forces, stress distribution in underground prosperities of rocks, rock indices, failure of rocks theories of rock movements and strata control.

Unit –V: - MINE ENVIRONMENTAL ENGINEERING - 1:

Ventilation, objectives/purposes of ventilation, systems of ventilation - natural ventilation and mechanical ventilation, Centrifugal, axial flow fans principle and construction details Distribution of mine air, ventilation devices, construction location and application. Auxiliary ventilation, Booster ventilation, Homotropical, anti-tropical systems. Laws of mine air friction, equivalent orifice of a mine, numerical problems, laws relative to passage of mine air, Atkinson's and modified Atkinsons equations, relation between pressure resistance –Formulas-splitting of air current, laws of mechanical ventilations, Determination of Fan efficiency Ventilation survey –Quality-Quantity-Pressure surveys-cooling power mine-kata factor –kata thermometer. Gas detectors- types, uses, application, principles, determination percentage of gases using conventional methods and using latest detectors, Flame safety lamp-Different types, construction details.

Unit –VI: - MINE ENVIRONMENTAL ENGINEERING - 2 :

Mine fires, classification, causes preventive measures spontaneous heating of coal, different methods of dealing with fires, Collection of air samples and interpretation of Mine air samples, Ventilation survey, types, instruments, Mine Explosions – Types, Fire damp explosions-causes and preventive measures, Coal dust explosions, water gas explosions-causes and preventive measures, treating coal dust, dust barriers, water barriers. Rescue and Recovery. Operations, objectives, classification of rescue apparatus, Resuscitation apparatus, rescue organization. Inundation in mines, its causes, precautions, design of dams. Mine lighting, purpose, Terms, Places to be illuminated in the mines. Miners diseases, causes and preventive measures.

Unit –VII: - MINE SURVEYING:

Definitions, Principles, classifications, Measurement of distances. Various instruments used in Surveying, chain survey, Fundamentals of compass survey, limitation of various surveying methods, various methods of leveling, types of levels, instruments, adjustments, computations, the odolite types, adjustments, traversing and computations, setting out curves, types, correlation survey, tachometric survey and triangulation Survey Electronic survey instruments, total station, CAD, remote sensing, GIS-GPS, and minor Instruments.

Unit –VIII: - MINING MACHINERY – 1:

Wire ropes- usage, chemical composition, tests of wires, classification, applicability of different wire ropes, causes of deterioration and precautions, capping, recapping methods and rope splicing, Transportation in mines - classification different types of rope haulages, their applicability, merits and demerits limitations. Safety devices in different rope haulages, Locomotive haulages-types, applicability's, Conveyors- types, tensioning arrangements, use and applicability in mines, Aerial ropeways, man riding applicability's, pumps their applicability in mines, construction details merits, demerits and limitations.

Unit –IX: - MINING MACHINERY – 2:

Coal face machinery, different Drills, Power loaders, Long wall face machinery-AFC, lump breakers, stage loaders, power pack, SERDS, DERDS, safety devices, power support, Mine cables-types, constructional details, Flame proof apparatus and Intrinsically safe apparatus- field of applications, features, remote control principle, Signaling methods used in mines, telephones, winding - purpose, equipment, types of headgear frames, shaft fittings, guides, Pit top and pit bottom arrangements, keps, suspension gear, types of drums, drum and skip winding, Cage winding and Friction (Keope Winding) speed control and safety contrivances.

Unit –X: - MINING LEGISLATION AND MINE MANAGEMENT:

Mines-Act, Mine-Rules and regulations provisions of Mine Act in respect of drinking water, Health, Hygiene, etc., Medical facilities. Limitations of employment, leave with wages, etc., Coal Mines/Metal Mines Regulations - Definitions duties of manager, over man, safety officer, under manager etc., Transport, Mine working ventilation etc., Precautions against Dangers from fire, dust gas, water etc., Mine lighting and safety. Industrial Dispute Act, Causes disputes work committee, strikes, lock out. Mine Management-Organization structure, safety in mines and Mine accidents. Entrepreneurship, self

employment scheme, market and demand survey, quality systems concepts, quality policy, quality control, quality assurance, ISO 9000, features, draw backs, recruitment, qualifications, training programmes, work-study.

12. ELECTRONICS AND INSTRUMENTATION ENGINEERING

Unit -I: Electrical Engineering: Ohm's law- Kirchoff's law, ideal voltage source and ideal current source and its conversions- star –delta transformation-basics of D.C Machines, motors and generators- A.C. machines-superposition's, Thevenin's and Norton's theorems, DC Maximum power transfer theorem, resonance in series and parallel circuits, Q-factor, AC Machines: alternator, Induction motor, synchronous motor.

Unit -II: Industrial electronics and control engineering:-Photo transistor, photo conductive device, photo multiplier, solar cell, opto-coupler, dot matrix and seven segment displays, bar graph, basic principles of induction heating, dielectric heating and resistance welding, generation and applications of ultrasonic's.- basics of open loop and closed loop control systems. Linear, nonlinear systems, time - variant and time- invariant system, continuous data, sampled data& Digital control systems-Transfer functions-signal flow graphs-Time response of first order and Second order system-concept of stability (Routh- Hurwitz).

Unit -III: Electronics: Resistor, Capacitor and Inductor specifications and applications of transformers, basics of switches , fuses , relays and microphones, PCB's, Semi conductor materials, PN junction formation, forward and reverse biasing voltages, formation ,working and configurations of PNP and NPN transistors, Zener diode, FET, MOSFET, UJT, diode as rectifier, C, LC and CLC filter circuits, RC coupled amplifier, transformer coupled amplifier, Darlington and cascaded amplifier, Class-A and Class-B push-pull amplifier, complementary type power amplifier, oscillator principle, RC phase shift and wien bridge oscillator, Boot strap sweep circuit, miller sweep circuit, bistable, astable and monostable multivibrator using transistor.

Unit -IV: Digital Electronics: Number systems, Different postulates, simplification of Boolean expressions, K-map(up to 3 variables reductions), logic gates, half adder and subtractor, full adder, RS, T, D, Master-slave and JK type flip-flops, counters, up/down counter, ring counter, Registers, shift registers, universal shift register, basic memories (RAM and ROM), ADC (Counter method, Successive approximation method) and DAC.(R-2R method, Binary weighted method)

Unit -V: Electronic Measuring instruments: Analog Instruments – Extension of range of Ammeter, Voltmeter and Ohmmeter, rectifier type voltmeter – FET voltmeter – Differential voltmeter, Megger, – Digital instruments – Ramp – Dual Slope integration – successive approximation – digital frequency meter. CRO – CRT – time base generator – deflection sensitivity – triggered sweep circuits – CRO applications: storage oscilloscopes, Digital oscilloscopes –AF Oscillator – RF Signal generator – AF and RF Power meters – Q meter – Distortion Factor Meter – Digital IC tester.

Unit -VI: Process Instrumentation: Fundamentals of instrumentation , basic transducer theory for the measurement of displacement(LVDT, Potentiometer, inductive, capacitive,), RVDT, angular velocity, temperature (Thermometers, RTD, Thermo couple, thermister, Pyrometers), pressure (elastic elements, Strain gauge, piezo electric) , Flow (Head type flow meters, rot meter, Electromagnetic flow meter, anemometers, Ultrasonic flow meter), PH, conductivity, weight, humidity, level, viscosity and density .

Unit -VII: Process Control: Different process variables ,process characteristics, On-off Control, Proportional, Integral and Derivative Controllers, PID Controller, Tuning of PID Controller, Actuators (Pneumatic, electro-pneumatic Hydraulic) basics of control valves, Cascade Controller, Ratio Controller, feed forward control systems ,Adaptive Control, Line Diagrams, Letter Codes, Basic of CNC Machine, Basics of Robot.

Unit -VIII: Communications and Linear IC Applications: Need and Types of Modulation, SSB, DSB and VSB transmission, AM and FM Transmitters, AM and FM Detectors, Basics of Pulse Modulation and Applications, Optical- Fiber Communication, , Characteristics of Operational Amplifier, Applications of Operational Amplifier like (Summer, Integrator, Differentiator, Inverter, Voltage Follower, V to I Converter, I to V Converter, Comparator, Isolation amplifier Square wave Generator, Mono Stable Multivibrator, Astable multi-vibrator, Wien-bridge Oscillator, Instrumentation Amplifier, Schmitt Trigger, ADC and DAC), Applications of 555 timer.

Unit -IX: Analytical and biomedical instrumentation: Electromagnetic Spectrum, Beer Lamberts Law, Mono Chromator, Light Sources and Detectors, Spectrophotometer (UV, Visible, IR), Flame Photometer, Spectrofluorometer, Interferometer, Refractometer, Polari meter, Different types of Gas Analyzer, Mass Spectrometer, Liquid Chromatography and Gas Chromatography, Basics of Diagnostic Equipment ECG , EEG,EMG ,Blood flow, Blood pressure measurement, Pace Maker, Defibrillator, X-Ray Equipment., CAT,MRI.

Unit -X: Microcontroller & PLCs: Architecture and Instruction set, Programming concepts of 8051 Micro controller, interfacing peripherals (8255, 8251, 8257 and 8259) and applications of 8051. Basics of PLC- Architecture and instruction set of PLC and applications, SCADA, DDC, DCS, DAS.

13. BIO – TECHNOLOGY

Unit –I: - Basic Industrial Biotechnology: Production Strains, Production media, Types of Media, Carbon, Nitrogen Sources, Biopesticides, Biofertilizers.

Unit –II: - Bio-Physics: Bio-Physics and Cell doctrine, Cell theory and Atomic theory, types of microscopes, Biological membranes, Applications of Bio-Physics.

Unit –III: - Genetics and Cell Biology: Mendelism and its variations, Linkage, Cell division, Chromosome Structure, Chromosome Aberrations, Genetic mechanism of Sex Determination, Sex-Linked genes, holandric genes.

Unit –IV: - Microbiology: Classification of Micro Organisms, Nutrition in Micro Organisms, Growth - measurement of microbial growth, culture media, synthetic complex media, Importance and isolation of pure cultures and primary stock cultures, preservation of cultures, control of micro organisms, disinfection and sterilization methods, chemical agents, physical agents, different classes of disinfections.

Unit –V: - Bio-Reactor Engineering: Classification of bioreactors, Energy balance of bioreactors, selectivity and optimization of bioreactors, design and analysis of bioreactors, introduction to microprocessors and their applications in bioreactors control, safety regulations and decontamination procedures practiced in the operation of bioreactors.

Unit –VI: - Molecular Biology - Genetic Engineering: Nucleic acids - Structure of DNA, RNA, replication of DNA, Organisation of nuclear genome, gene numbers, essential and non-essential genes, Chargaff's one gene, one enzyme hypothesis - Phenyl ketonuria, alkaptonuria and albinism, protein synthesis, applications of Genetic Engineering.

Unit –VII: - Plant Bio-Technology: Tissue culture, techniques, application of plant tissue culture, protoplast technology - isolation, culture of protoplasts, regeneration of cell wall and callus formation - protoplast fusion. Genetic engineering through plasmids, Ti Plasmid, gene transfer in plants - Symbiotic N₂ fixation, plant protection, applications - methods.

Unit –VIII: - Animal Bio- Technology: Animal cell and tissue culture, Animal organ culture techniques - Advantages - Limitations and applications, production of transgenic animals by microinjection, future prospects of transgenesis, Cell culture products.

Unit –IX: - Bio-Informatics: Bio-Informatics in biology and medicine, bio-molecules and bio-polymers, genome analysis.

Unit –X: - Enzyme Engineering: Classification of Enzymes, Applications, Physical and Chemical techniques for enzyme immobilization - advantages and disadvantages of immobilization techniques. Structure of Enzymes - Primary and secondary structure and peptide bond.

14. PHARMACY

14. 1. PHARMACEUTICS

Unit - I:

1. Introduction of different dosage forms. Their classifications with examples- their relative applications. Familiarisation with new drug delivery systems.
2. Introduction to Pharmacopoeias with special reference to the Indian Pharmacopoeia.
3. Metrology-Systems of weights and measures. Calculations including conversion from one to another system. Percentage calculations and adjustments of products. Use of allegation method in calculations, Isotonic solutions.
4. Packing of pharmaceuticals-Desirable features of a container- types of containers, study of Glass and plastics as materials for containers and rubber as a material for closures- their merits and demerits. Introduction to aerosol packaging.

Unit -II:

5. Size reduction Objectives and factors affecting size reduction, methods of size reduction- Study of Hammer mill, ball mill, Fluid Energy Mill and Disintegrator.
6. Size separation- Size separation by sifting, Official Standard for powders. Sedimentation methods of size separation. Construction and working of cyclone separator.
7. Mixing and Homogenization-Liquid-mixing and powder mixing. Mixing and semisolid, Study of Silverson Mixer - Homogeniser, planetary Mixer, Agitated powder mixer. Triple Roller Mill, Propeller Mixer, Colloid Mill and Hand Homogeniser. Double cone mixer.
8. Clarification and Filtration-Theory of filtration, Filter media; Filter aids and selections of filters. Study of the following filtration equipments - Filter Press, Sintered Filter, candles, Metafilter.
9. Extraction and Galenicals- (a) Study of percolation and maceration and their modification, continuous hot extraction-Applications in the preparation of tinctures and extracts. (b)Introduction to Ayurvedic dosage forms.
10. Heat process Evaporation- Definition, Factors affecting evaporation, Study of evaporating still and Evaporating pan.
11. Distillation- simple distillation and Fractional distillation; Steam distillation and vacuum distillation Study of Vacuum still, preparation of Purified Water I.P and water for Injection I.P. Construction and working of the still used for the same.
12. Introduction to drying process- Study of Tray Dryers; fluidized Bed Dryer, Vacuum Dryer and Freeze Dryer.

Unit -III:

13. Sterilization – Concept of sterilization and its differences from disinfection – Thermal resistance of micro-organism. Detailed study of the following sterilization process.
 - (i) Sterilization with moist heat.
 - (ii) Dry heat sterilization.
 - (iii) Sterilization by radiation.
 - (iv) Sterilization by filtration and
 - (v) Gaseous sterilizationAseptic techniques. Application of sterilization processes in hospitals particularly with reference to surgical dressings and intravenous fluids. Precautions for safe and

effective handling of sterilization equipments.

16. Study of immunological products likes sera vaccines, toxoids & their preparations.

Unit -IV:

14. Processing of tablets-Definition; Different types of compressed tablets and their properties. Processing involved in the production of tablets; Tablets; Physical Standards including Disintegration and Dissolution. Tablet coating- sugar coating; Film coating, enteric coating and, microencapsulation. Tablet coating may be dealt in an elementary manner.

15. Processing of Capsules- Hard and Soft gelatin capsules; different sizes capsules; filling of capsules; handling storage of capsules; Special application of capsules.

Unit -V:

1. Dispensing pharmacy:

(i) Prescriptions: Reading and understanding of prescription: Latin terms commonly used (Detailed study is not necessary), Modern methods of prescribing, adoption of metric system. Calculations involved in dispensing.

(ii) Incompatibilities in Prescriptions – Study of various types of incompatibilities – Physical, chemical and therapeutic.

(iii) Posology – dose and Dosage of drugs, Factors influencing dose, Calculations of doses on the basis of age, sex and surface area, Veterinary doses

Unit -VI:

2. Dispensed Medications:

(Note: A detailed study of the following dispensed medication is necessary. Methods of preparation with theoretical and practical aspects. Use of appropriate containers and closures, Special labeling requirements and storage conditions should be highlighted).

(i) Powders: Types of powders – Advantages and disadvantages of powders. Granules. Cachets and Tablet triturates. Preparation of different types of powders encountered in prescription Weighing methods, possible errors in weighing , minimum weighable amounts and weighing of material below the minimum weighable amount, geometric dilution and proper usage and care of dispensing balance.

Unit -VII:

(ii) Liquid Oral Dosage Forms:

(a) Monophasic – Theoretical aspects including commonly used vehicles, essential adjuvant like stabilizers, colorants and flavors, with examples.

Review of the following monophasic Liquids with details of formulation and practical Methods.

Liquids of internal

Mixtures and concentrates
Syrups
Elixirs

Liquids for external administration
or used on mucus membranes

Gargles
Mouth washes
Throat Paints
Douches
Ear Drops
Nasal drops & Sprays
Liniments
Lotions

(b) Biphasic Liquid Dosage Forms:

(i) Suspensions (elementary study) - suspensions containing diffusible solids and liquids and their preparations. Study of the adjuvants used like thickening agents, wetting agents, their necessity and quantity to be incorporated. Suspensions of precipitate forming liquids like tinctures, their preparations and stability. Suspension produced by chemical reaction. An introduction to flocculated, non-flocculated suspension system.

(ii) Emulsions – Types of emulsions, identification of emulsion system, formulation of emulsions, selection of emulsifying agents. Instabilities in emulsions. Preservation of emulsions.

Unit -VIII:

(iii) Semi- Solid Dosage Forms:

- a) Ointments – Types of ointments, classification and selection of dermatological vehicles. Preparation and stability of ointments by the following process.
 - (i) Trituration (ii) Fusion (iii) Chemical reaction (iv) Emulsification.
- (b) Pastes – Difference between ointments and pastes. Bases of pastes. Preparation of pastes and their preservation.
- (c) Jellies-An introduction to the different types of jellies and their preparation.
- (d) An elementary study of poultice.
- (e) Suppositories and pessaries - their relative merits and demerits. Types of suppositories, suppository bases, classification, Properties, preparation and packing of suppositories, Use of suppositories for Drug absorption.

(iv) Dental and cosmetic Preparations:

Introduction to Dentifrices, Facial cosmetics, Deodorants, Antiperspirants, Shampoos, hair dressings and hair removers.

Unit -IX:

(v) Sterile Dosage Forms:

- (a) Parenteral dosage forms- definitions. General requirements for parenteral dosage forms, Types of parenteral formulations, vehicles, adjuvants, processing personnel, facilities and Quality control. Preparation of intravenous fluids and admixtures. Total parenteral nutrition, dialysis fluids.
- (b) sterility testing, particulate matter monitoring, faulty seal packaging.
- (c) Ophthalmic products- study of essential characteristics of different ophthalmic preparations. Formulation additives. Special precautions in handling and storage of ophthalmic products.

Unit -X:

1. Origin and nature of pharmaceutical legislation in India, its scope and objectives, Evolution of the “Concept of Pharmacy” as an integral part of the Health Care system.
2. Principles and significance of Professional Ethics, Critical study of the code of Pharmaceutical Ethics drafted by Pharmacy Council in India
3. Pharmacy Act, 1948 – General study of the Pharmacy Act with special reference to Education Regulations, working of State and Central Councils, constitution of these councils and functions, Registration procedures under the Act.

4. The Drugs and Cosmetics Act, 1940 – General study of the Drugs and Cosmetics Act the Rules hereunder. Definitions and salient features related to retail and wholesale distribution of drugs. The powers of Inspectors, the sampling procedures and the procedure and formalities in obtaining licenses under the rule. Facilities to be provided for running a Pharmacy effectively. General study of the Schedules with special reference of schedules C, C1, F.G, J, H, P and X and salient features of labeling and storages condition of drugs.

Unit -XI:

5. The Drugs and Magic Remedies (Objectionable Advertisement) Act, 1954 – General study of the Act Objective, special reference to be laid on advertisements. Magic remedies and objectionable and permitted advertisements – disease which cannot be claimed to be cured.

6. Narcotic Drugs and Psychotropic Substances Act, 1985 –A brief study of the act with special reference to its objectives, offences and punishment.

7. Brief introduction of the study of the following acts.

- i) Latest Drugs (Price Control) Order in force.
- ii) Poisons Act 1919 (as amended to date)
- iii) Medicinal and Toilet Preparations (Excise Duties) Act, 1971 (as amended to date)
- iv) Medical Termination of Pregnancy Act. 1971 (as amended to date)

14.2. PHARMACEUTICAL CHEMISTRY

Unit -I:

1. General discussions on the following inorganic compounds including important physical and chemical properties, medical and pharmaceutical uses, storage conditions and chemical incompatibility.

- (A) Acids, bases and buffers - Boric Acid, Hydrochloric acid, strong ammonium hydroxide. Calcium hydroxide. Sodium hydroxide and official buffers.
(B) Antioxidants – Hypophosphorous acid, Sulphur dioxide, Sodium bisulphate, Sodium metabisulphite, Nitrogen and Sodium Nitrite.

Unit -II :

(C) Gastrointestinal agents:-

- I. Acidifying agents - Dilute hydrochloric acid.
- II. Antacids - sodium bicarbonate, Aluminium hydroxide gel, Aluminium phosphate, Calcium carbonate, Magnesium carbonate, Magnesium trisilicate, Magnesium Oxide, Combinations of antacid preparations
- III. Protectives and Adsorbents- Bismuth subcarbonate and Kaolin.
- IV. Saline Cathartics- Sodium Potassium tartarate and Magnesium sulphate.

Unit -III:

(D) Topical Agents:-

- I. Protectives- Talc, Zinc Oxide, Calamine, Zinc stearate, Titanium dioxide, silicone polymers.
- II. Antimicrobials and Astringents- Hydrogen peroxide, Potassium permanganate, Chlorinated lime, Iodine, Solutions of Iodine, Povidone- Iodine, Boric acid, Borax, Silver nitrate, Mild silver protein, Mercury, Yellow mercuric oxide, Ammoniated mercury.
- III. Sulphur and its compounds- Sublimed sulphur, precipitated sulphur, selenium sulphide.
- IV. Astringents - Alum and Zinc Sulphate.

Unit -IV:

- (E) Dental Products-Sodium Fluoride, Stannous Fluoride, Calcium carbonate, Sodium metaphosphate, Dicalcium phosphate, Strontium chloride, Zinc chloride.
(F) Inhalants- Oxygen, Carbondioxide, Nitrous oxide.
(G) Respiratory stimulants- Ammonium carbonate
(H) Expectorants and emetics – Ammonium chloride, potassium iodide, Antimony potassium tartarate.
(I) Antidotes-Sodium nitrite

Unit -V:

2. Major Intra and Extracellular electrolytes:-

- (A) Electrolytes used for replacement therapy-Sodium chloride and its preparation. Potassium chloride and its preparation.
(B) Physiological acid-base balance and electrolytes used- Sodium acetate, Potassium acetate, Sodium bicarbonate injection, Ammonium chloride and its injection.
(C) Combination of oral electrolyte Powder and Solutions.

Unit -VI:

1. Inorganic Official compounds of iron, iodine, and calcium ferrous sulphate and Calcium gluconate.
2. Radio pharmaceuticals and Contrast media-Radio activity-Alpha, Beta and Gamma Radiations, Biological effects and Radiations Measurements of radio activity, G.M Counter, Radio isotopes their uses, storage and precautions with special reference to the official preparations.
3. Quality control of Drugs and Pharmaceuticals-Importance of quality control, significance efforts, methods used for quality control, sources of impurities in pharmaceuticals. Limit tests for Arsenic, Chloride, sulphate, Iron and Heavy Metals.
4. Identification tests for cations and anions as per Indian pharmacopeia.

Unit -VII:

1. Introduction to the nomenclature of organic chemical systems with particular reference to heterocyclic system containing upto 3 rings.
2. The Chemistry of following Pharmaceutical organic compounds - Covering their nomenclature, chemical structure, uses and the important Physical and Chemical Properties. (Chemical structure of on those compounds marked with asterisk. (*).The stability and storage conditions and the different type of Pharmaceutical formulations of these drugs and their popular brand names.

Antiseptics and Disinfectants – Proflavine * Benzalkoniumchloride, cetrimide, chlorocresol

* Chloroxylyene, Formaldehyde solution, Hexachlorophene, Liquified phenol, Nitrofurantoin

UNIT-VIII:

Sulfonamides–Sulfadiazine,Sulfaguandine*,Phthalylsulfathiazole,succinylsulfathizole.

Sulfadimethoxazole, Cotrimoxazole, Sulfacetamide*

Antileprotic Drugs – Clofazimine, Thiambutosine, Dapsone*, Solapsone.

Anti – tubercular Drugs – Isoniazid *, PAS*, Streptomycin, Rifampicin, Ethambutol* Thiacetazone, Ethionamide, Cycloserine, Pyrazinamide*.

Antiamoebic and Anthelmintic Drugs –Emetine, Metronidazole*, Halogenated hydroxyquinolines, diloxanide furoate, paramomycin , Piperazine*, Mebandazole, D.E.C.*

Antibiotics – Benzyl Penicillin*, Phenoxy methyl Penicillin*, Benzathine Penicillin, Ampicillin*, Cloxacillin, Carbencillin, Gentamicin, Neomycin, Erythromycin, Tetracycline, Cephalixin, Cephaloridine, Cephalothin, Griseofulvin, Chloramphenical.

Antifungal agents – Undecylenic acid, Tolnaftate, Nystatin, Amphoteracin, Hamycin

Antimalarial Drugs – Chloroquine, Amodiaquine, Primaquine, Trifluperazine, Thiothixene, Haloperidol, Triperidol, Oxypertine, Chlordiazepoxide, Diazepam, Lorazepam, Meprobamate.

Unit -IX:

Hypnotics:- Phenobarbitone, butobarbitone, Cyclobarbitone, Nitrazepam, Glutethimide*, Methypylone, Paraldehyde, Triclofos sodium.

General Anaesthetics – Halothane*, Cyclopropane*, Diethylether*, Methohexital sodium, Thiopental sodium ,Trichloroethylene.

Antidepressant Drugs - Amitriptyline, imipramine* phenelzine, Tranylcypramine.

Analeptics- Theophylline, Caffeine*, Coramine*, Dextroamphetamine.

Adrenergic Drugs- Adrenaline*, Noradrenaline, Isoprenaline*, Phenylephrine, Salbutamol, Terbutaline, Ephedrine*, Pseudoephedrine.

Adrenergic Antagonist – Tolazoline, Propranolol*, Practolol.

Cholinergic Drugs- Neostigmine*, Pyridostigmine, Pralidoxime, Pilocarpine, Physostigmine*.

Cholinergic antagonists-Atropine*, Hyoscine, Homatropine, Propantheline*, Benztropine, Tropicamide, Biperiden*.

Diuretic Drugs- Furosemide*, Chlorothiazide, Hydrochlorothiazide*, Benzthiazide, Urea*, Mannitol*, Ethacrynic Acid.

Unit -X:

Cardiovascular Drugs- Ethyl nitrite*, Glyceryl Trinitrate, Alpha methyl dopa, Guanethidine, Chlorpropamide*, Tolbutamide, Glibenclamide, Phenformin*, Metformin.

Coagulants and Anti-Coagulants- Heparin, Thrombin, Menadione*, Bishydroxycoumarin, warfarin sodium.

Local Anesthetics - lignocaine procaine, Benzocaine

Histamine and anti - histaminic agents – Histamine, Diphenhydramine*, Promethazine
Cyproheptadine, Mepyramine, Pheniramine, Chlorpheniramine*.

Analgesics and Anti-pyretics- Morphine, Pethidine*, Codeine, Methadone, Aspirin*, Paracetamol*, Analgin, Dextropropoxyphene. Pentazocine.

Non-steroidal anti –inflammatory Agents- indomethacin*, Phenyl butazone, oxyphenbutazone
Ibuprofen.

Thyroxine and Antithyroids- Thyroxine, Methimazole, Methylthiouracil, Propylthiouracil

Diagnostic Agents- Iopanoic Acid, Propyl iodone, Sulfobromophthalein, Sodium indigotin
disulfonatae, indigo Carmine, Evansblue, Congo Red, Fluorescein Sodium.

***Anticonvulsants, Cardiac glycosides, Antiarrhythmic, Antihypertensives & vitamins.**

Steroidal drugs –Betamethazone, Cortisone, Hydrocortisone, Prednisolone, Progesterone,
Testosterone, Oestradiol, Nandrolone

Anti-Neoplastic Drugs- Actinomycines, Azathioprine, Busulphan, Chlorambucil, cisplatin
Cyclophosphamide, Daunorubicin hydrochloride, Flurouracil, Mercaptopurine, Methotrexate,
Mitomycin,

Unit -XI:

1. Introduction to biochemistry.
2. Brief chemistry and role of proteins, polypeptides and amino acids, classifications, Quantitative tests, Biological value, Deficiency diseases.
3. Brief Chemistry and role of carbohydrates, Classification, qualitative tests, Diseases related to carbohydrate metabolism.
4. Brief Chemistry and role of Lipids, Classification, Qualitative tests, Diseases related to lipid metabolism
8. Brief concept of normal and abnormal metabolism of proteins, carbohydrates and lipids.

Unit -XII:

5. Brief Chemistry and role of vitamins and Coenzymes.
6. Role of minerals and water in life processes
7. Enzymes; Brief concept of enzymatic action. Factors affecting it. Therapeutic and pharmaceutical importance..
9. Introduction to pathology of blood and urine.
 - (a) Lymphocytes and Platelets, their role in health and disease.
 - (b) Erythrocytes, Abnormal cells and their significance.
 - (c) Abnormal constituents of urine and their significance in diseases.

14.3. PHARMACOGNOSY

Unit -I:

1. Definition, history and scope of Pharmacognosy including indigenous system of medicine.
2. Various systems of classification of drugs of natural origin.
3. Adulteration and drug evaluation; significance of Pharmacopial standards.
4. Brief outline of occurrence, distribution, outline of isolation, identification tests, therapeutic and pharmaceutical applications of alkaloids, terpenoids, glycosides, volatile oils, tannins and resins.
5. Collection and preparation of crude drug for the market as exemplified by Ergot, Opium, Rauwolfia, Digitalis, Senna.
6. Study of source, preparation and identification of fibres used in sutures and surgical dressings – cotton, silk, wool and regenerated fibre.
7. Gross anatomical studies of Senna, Datura, Cinnamon, Cinchona, Fennel, Clove, Ginger, Nuxvomica & Ipecacuanha

Unit -II:

8. Occurrence, distribution, organoleptic evaluation, chemical constituents including tests wherever applicable and therapeutic efficacy of following categories of drugs.
 - (a) **Laxatives:** Aloes, Rhubarb, Castor oil, Ispaghula, Senna.
 - (b) **Cardiotonics-** Digitalis, Arjuna.
 - (c) **Carminatives & G.I regulators-** Umbelliferous fruits, Coriander, Fennel, Ajowan, Cardamom, Ginger. Black pepper, Asafoetida, Nutmeg, Cinnamon, Clove.
 - (d) **Astringents** – Catechu.
 - (e) **Drugs acting on nervous system** –Hyoscyamus, Belladonna, Aconite, Ashwagandha; Ephedra, Opium, Cannabis, Nuxvomica.
 - (f) **Antihypertensives** – Rauwolfia.
 - (g) **Antitussive** – Vasaka, Tolu balsam, Tulsi.
 - (h) **Antirheumatics** – Guggul, Colchicum.
 - (i) **Antitumour** – Vinca.
 - (j) **Antileprotics** – Chaulmoogra Oil.
 - (k) **Antidiabetics** – Pterocarpus, Gymnema Sylvestre
 - (l) **Diuretics** – Gokhru, Punarnava.

Unit -III:

- (m) **Antidysentrics** – Ipecacuanha.
- (n) **Antiseptics and disinfectants** - Benzoin, Myrrh, Nim , curcuma.
- (o) **Antimalarials** – Cinchona.
- (p) **Oxytocics** – Ergot
- (q) **Vitamins** – Shark liver Oil and Amla.
- (r) **Enzymes** – Papaya, Diastase, Yeast.
- (s) **Perfumes and flavouring agents** – peppermint Oil, Lemon Oil, Orange, grass oils, Sandalwood.
- (t) **Pharmaceutical aids** – Honey, arachis Oil, Starch, Kaolin, Pectin, Olive oil, Lanolin, Beeswax, Acacia, Tragacanth, Sodium alginate, Agar, Guar gum, Gelatin.
- (u) **Miscellaneous** – Liquorice, Garlic, Picrorrhiza, Dioscorea, Linseed. Shatavari, Shanknapushpi, Pyrethrum, Tobacco.

Unit -IV:

1. Introduction – Trade, industry and Commerce, Functions and subdivision of commerce, introduction of Elements of Economics and management
2. Forms of Business Organizations.
3. Channels of Distribution.
4. Drug House Management - Selection of Site, Space Lay-out and legal requirements. Importance and objectives of purchasing, selection of suppliers, credit information, Tenders, contract and price determination and legal requirements there to. Codification, handling of drug stores and other hospital supplies.
5. Inventory Control – objects and importance, modern techniques like ABC, VED analysis, the lead time, inventory carrying cost, safety stock, minimum and maximum stock levels, economic order quantity, scrap and surplus disposal.
6. Sales promotion, Market Research, Salesmanship, qualities of salesman, Advertising and Window Display.
7. Recruitment, training, evaluation and compensation of the pharmacist.

Unit -V:

8. Banking and Finance Service and Functions of bank. Finance planning and sources of Finance.

Part-II Accountancy

1. Introduction to the accounting concepts and conventions. Double entry book keeping
Different kinds of Account.
2. Cash Book
3. General Ledger and Trial Balance Sheet
4. Profit and Loss Account and Balance Sheet
5. Simple technique of analyzing financial statements, Introduction to Budgeting

Unit -VI:

1. Concept of health- Definition of Physical health, mental health, social health, spiritual health determinants of health, indicator of health, concept of disease, natural history of diseases, the disease agents, concept of prevention of diseases.
2. Nutrition and health- Classification of foods requirements, disease induced due to deficiency of proteins, Vitamins and minerals, treatment and prevention.
3. Demography and family planning – Demography cycle, fertility, family planning, contraceptive methods, behavioral methods, natural family planning method, chemical method, mechanical methods, hormonal contraceptives, population problem of India.
4. First aid – Emergency treatments in shock, snake bite, burns, poisoning, heart disease, fractures and resuscitation methods. Elements of minor surgery and dressings.
5. Environments and health – Sources of water supply, water pollution, purification of water, health and air, noise, light, solid waste disposal and control, medical entomology, arthropod borne disease and their control, rodents, animals and diseases.

Unit -VII:

6. Fundamental Principles of microbiology, classification of microbes, isolation, staining techniques of organisms of common diseases.
7. Communicable diseases – Causative agents, modes of transmission and prevention.
(a) Respiratory infection – Chicken pox, measles, Influenza, diphtheria, whooping cough and tuberculosis.

- (b) Intestinal infections; Poliomyelitis, Hepatitis, Cholera, Typhoid, Food Poisoning, Hookworm infection.
 - (c) Arthropod borne infections – plague, Malaria; Filariasis.
 - (d) Surface infection – Rabies, Trichoma, Tetanus, Leprosy.
 - (e) Sexually transmitted diseases – Syphilis, Gonorrhoea, AIDS.
8. Non- communicable diseases – causative agents, prevention, care and control. Cancer, Diabetes; Blindness, Cardiovascular diseases.
 9. Epidemiology its scope, methods, uses, dynamics of diseases of transmission immunity and immunization; Immunological products and their dose schedule, principles of disease control and prevention, hospital acquired infection, prevention and control, Disinfection, types of disinfection, disinfection procedures, faeces urine, sputum, room linen, dead-bodies, instruments.

Unit -VIII:

1. Scope of Anatomy and Physiology, Definition of various terms used in Anatomy.
2. Structure of cell, function of its components with special reference to mitochondria and microsomes.
3. Elementary tissues of body, i.e. epithelial tissue, muscular tissue, connective tissue and nervous tissue.
4. Structure and function of skeleton, Classification of joints and their function, joint disorder.
5. Composition of blood, functions of blood elements. Blood groups and coagulation of blood. Brief information regarding disorders of blood.
6. Name and functions of lymph glands.

Unit -IX:

7. Structure and functions of various parts of the heart. Arterial and venous system with special reference to the names and positions of main arteries and veins. Blood pressure and its recording. Brief information about cardiovascular disorders.
8. Various parts of respiratory system and their functions, Physiology of respiration.
9. Various parts of urinary system and their functions, structure and functions of kidney, physiology of Urine formation, Pathophysiology of renal diseases and oedema.
10. Structure of skeletal muscle. Physiology of muscle contraction, Names, position, attachments and functions of various skeletal muscles, Physiology of neuromuscular junction.
11. Various part of central nervous system, brain and its parts, functions and reflex action. Anatomy and Physiology of autonomic nervous system.
12. Elementary knowledge of structure and functions of the organs of taste, smell, ear, eye and skin, Physiology of pain.
13. Digestive system; names of the various parts of digestive system and their functions, structure and functions of liver, physiology of digestion and absorption.
14. Endocrine glands and Hormones. Locations of the glands, their hormones and functions. Pituitary, thyroid, Adrenal and pancreas.
15. Reproductive systems – Physiology and Anatomy of Reproductive system.

14.4. PHARMACOLOGY

Unit -I:

1. Introduction to Pharmacology, scope of pharmacology.
2. Routes of administration of drugs their advantages and disadvantages.
3. Various processes of absorption of drugs and the factors affecting them, Metabolism, Distribution and excretion of drugs.
4. General mechanism of drugs action and the factors which modify drug action

Unit -II:

5. Pharmacological classification of drugs. The discussion of drugs should emphasise the following aspect:
 - i) Drugs acting on the Central Nervous System:
 - a) General anaesthetics, adjunction to anaesthesia, intravenous anaesthetics.
 - b) Analgesic antipyretics and non-steroidal anti-inflammatory drugs, Narcotic analgesics, Antirheumatic and antigout remedies, Sedatives and Hypnotics, Psychopharmacological agents, anti convulsants, analeptics
 - c) Centrally acting muscle relaxants and anti-parkinsonism agents
 - ii) Local anaesthetics.
 - iii) Drug acting on autonomic nervous system
 - a) Cholinergic drug, anticholinergic drugs, anticholinesterase drugs.
 - b) Adrenergic drugs and adrenergic receptor blockers.
 - c) Neurone blockers and ganglion blockers,
 - d) Neuromuscular blockers, drugs used in myasthenia gravis.
 - iv) Drugs acting on eye, mydriatics, drugs used in glaucoma.

Unit -III:

- v) Drugs acting on respiratory system-Respiratory stimulants, Bronchodilators, Nasal decongestants, Expectorants and Antitussive agents.
- vi) Antacids, Physiological role of histamine and serotonin, Histamine and Antihistamines, Prostaglandins.
- vii) Cardio Vascular drugs, Cardio tonics, Antiarrhythmic agents, Antianginal agents, Antihypertensive agents, Peripheral Vasodilators and drugs used in atherosclerosis.
- viii) Drugs acting on the blood forming organs, Haematinics, Coagulants and anti-Coagulants, Haemostatics, Blood substitutes and plasma expanders.
- ix) Drugs affecting renal function- Diuretics and antidiuretics.
- x) Hormones and hormone antagonists- hypoglycemic agents, Antithyroid drugs, sex hormones and oral contraceptives, corticosteroids.
- (xi) Drugs acting on digestive system-Carminatives, digestants, Bitters, Antacids and drugs used in Peptic ulcer, purgatives, and laxatives, Antidiarrhoeals, Emetics, Antiemetics, Antispasmodics.

Unit -IV:

6. Chemotherapy of microbial disease: Urinary antiseptics, Sulphonamides. Penicillins, Streptomycin. Tetracyclines and other antibiotics, Antitubercular agents, anti fungal Agents, anti viral drugs, antileprotic drugs.
7. Chemotherapy or protozoal diseases. Anthelmintic drugs
8. Chemotherapy of cancer.

9. Disinfectants and antiseptics

A detailed study of the action of drugs on each organ is not necessary.

Unit -V:

1. Hospitals Definition, Function, Classification based on various criteria, organization, Management and Health delivery system in India.

2. Hospital Pharmacy:

a) Definitions

b) Functions and objectives of Hospital Pharmaceutical services.

c) Location, Layout, Flowchart of material and men.

d) Personnel and facilities requirements based on individual and basic needs.

e) Requirements and abilities required for Hospital Pharmacists.

3. Drug Distribution system in Hospitals :

a) Out – Patient service

b) In –Patient services

(a) Types of services

(b) detailed discussion of Unit system. Floor and ward stock system, Satellite Pharmacy Service, Central services, Bedside Pharmacy.

4. Manufacturing:

a) Economical considerations, estimation of demand.

b) Sterile manufacture – large and small volume parenterals, facilities, requirements, layout production planning, man-power requirements.

c) Non sterile manufacture-Liquid orals, externals- bulk concentrates.

d) Procurement of stores and testing of raw materials.

Unit -VI:

5. Nomenclature and uses of surgical instruments and Hospital Equipments and health accessories.

6. P.T.C (Pharmacy Therapeutic Committee), Hospital Formulary System and their organization, functioning, composition.

7. Drug information service and Drug information Bulletin.

8. Surgical dressing like cotton, gauze, bandages and adhesive tape including their pharmacopoeial tests of quality. Other hospital supply e.g I.V. Sets B.G. Sets, Ryals tubes, Catheters, Syringes etc.

9. Application of computers in maintenance of records, inventory control medication monitoring, drug information and data storage and retrieval in hospital and retail pharmacy establishments.

Unit -VII:

1. Introduction to Clinical Pharmacy Practice – Definition, Scope

2. Modern dispensing – Pharmacists and Patient counseling advice for the use of common drugs, medication history.

3. Common daily terminology used in the practice of medicine.

4. Disease, manifestation and Pathophysiology including salient symptoms to understand the disease like Tuberculosis, Hepatitis, Rheumatoid Arthritis, Cardiovascular diseases, Epilepsy. Diabetes, peptic ulcer, Hypertension.

5. Physiological parameters with their significance.

Unit -VIII:

6. Drug interactions:

- a) Definition and introduction.
- b) Mechanism of Drug Interaction.
- c) Drug – drug interaction with reference to analgesics, diuretics, cardiovascular drugs. Gastro – intestinal agents, Vitamins and Hypoglycemic agents.
- d) Drug – food interaction

7. Adverse Drug Reaction:

- a) Definition and Significance.
- b) Drug – induced disease and Teratogenicity.

8. Drugs in Clinical Toxicity – introduction, general treatment of poisoning, Systemic antidotes, Treatment of insecticide poisoning, heavy metal poison, Narcotic drugs Barbiturate, Organophosphorous poisons.

9. Drug dependence, Drug abuse, addictive drugs and their treatment, complications

10. Bio-availability of drugs, including factors affecting it.

ANNEXURE – II

15. FOR B.Sc (MATHEMATICS) GRADUATES Syllabus

Syllabus for common entrance Test ECET [FDH & B.Sc (Mathematics)]-2015

15.1 MATHEMATICS (B.Sc. Mathematics)

Unit - I:

Differential Equations of First Order and First Degree: Linear Differential Equations; Differential Equations Reducible to Linear Form; Exact Differential Equations; Integrating Factors; Change of Variables. Differential Equations of the First Order but not of the First Degree: Equations Solvable for p ; Equations Solvable for y , Equations Solvable for x ; Equations that do not Contain x (or y); Equations Homogeneous in x and y ; Equations of the First Degree in x and y ; Clairaut's Equation

Unit - II:

Higher Order Linear Differential Equations: Solution of Homogeneous Linear Differential Equations of Order n with Constant Coefficients. Solution of the Non-homogeneous Linear Differential Equations with Constant Coefficients by means of Polynomial Operators.

(i) When $Q(x) = bx^k$ and $P(D) = D - a_0, a_0 \neq 0$

(ii) When $Q(x) = bx^k$ and $P(D) = a_0 D^n + a_1 D^{n-1} + \dots + a_n$

(iii) When $Q(x) = e^{ax}$

(iv) When $Q(x) = b \sin ax$ or $b \cos ax$

(v) When $Q(x) = e^{ax} V$ where V is a function of x .

(vi) When $Q(x) = xV$. Where V is any function x .

Unit - III:

Elements of Number Theory: Divisibility, Primes, Congruences, Solutions of Congruences, Congruences of Degree 1; the Function $\phi(n)$.

Unit – IV:

Binary Operations: Definition and Properties, Tables.

Groups: Definition and Elementary Properties; Finite Groups and Group Tables.

Subgroups: Subsets and Subgroups; Cyclic Subgroups

Permutations: Functions and Permutations; Groups of Permutations, Cycles and Cyclic Notation, Even and Odd Permutations, The Alternating Groups

Cyclic Groups: Elementary Properties, The Classification of Cyclic Groups, Subgroups of Finite Cyclic Groups

Isomorphism: Definition and Elementary Properties, How to show that groups are Isomorphic, How to show that Groups are Not Isomorphic, Cayley's Theorem.

Groups of Cosets: Cosets, Applications.

Normal Subgroups and Factor Groups: Criteria for the Existence of a Coset Group; Inner Automorphisms and Normal Subgroups; Factor Groups; Simple Groups

Homomorphisms: Definition and Elementary Properties; The Fundamental Homomorphism Theorem; Applications.

Unit - V:

Vector Differentiation: Differential Operator, Gradient, Divergence, Curl

Vector Integration: Theorems of Gauss, Green and Stokes and Problems related to them.

Unit - VI:

The Plane: Every equation of the first degree in x, y, z represents a plane, Converse of the preceding Theorem; Transformation to the normal form, Determination of a plane under given conditions.

i) Equation of a plane in terms of its intercepts on the axes.

ii) Equations of the plane through three given points.

Systems of planes; Two sides of a plane; Length of the perpendicular from a given point to a given plane; Bisectors of angles between two planes; Joint equation of two planes; Orthogonal projection on a plane; Volume of a tetrahedron in terms of the co-ordinates of its vertices; Equations of a line; Right Line; Angle between a line and a plane; The condition that a given line may lie in a given plane; The condition that two given lines are coplanar, Number of arbitrary constants in the equations of a straight line. Sets of conditions which determine a line; The shortest distance between two lines. The length and equations of the line of shortest distance between two straight lines; Length of the perpendicular from a given point to a given line; Intersection of three planes; Triangular Prism.

The Sphere: Definition and equation of the sphere; Equation of the Sphere through four given points; Plane sections of a sphere. Intersection of two spheres; Equation of a circle. Sphere through a given circle; Intersection of a sphere and a line. Power of a point; Tangent plane. Plane of contact. Polar plane. Angle of intersection of two spheres. Conditions of two spheres. Conditions for two spheres to be orthogonal; Radical plane, coaxial system of spheres; Simplified form of the equation of two spheres.

Unit - VII:

The Real Numbers: The algebraic and Order Properties of \mathbb{R} ; Absolute Value and Real Line; The Completeness Property of \mathbb{R} ; Applications of the Supremum Property; Intervals (No question should be set from this part).

Sequences and Series: Sequences and their Limits; Limits Theorems; Monotone Sequences; Subsequences and the Bolzano - Weierstrass Theorem; The Cauchy Criterion; Properly Divergent Sequences; Series.

Limits: Limits of Functions, Limits Theorems, Some Extensions of the Limit Concept.

Continuous Functions: Continuous Functions, Combinations of Continuous Functions; Continuous Functions on Intervals, Uniform Continuity, Definition, Non-Uniform Continuity Criteria, Uniform Continuity Theorem.

Unit - VIII:

Differentiation: The derivative, The Mean Value theorem, L'Hospital Rules, Taylor's Theorem.

The Riemann Integral: The Riemann Integral, Riemann Integrable Functions, the Fundamental theorem (Scope as in Introduction to Real Analysis by Robert G. Bartle and Donald R. Sherbert, published by John. Willey and Sons, Inc.)

Unit - IX:

Rings: Definition and Basic Properties, Fields.

Integral Domains: Divisors of 0 and cancellation, Integral domains, The Characteristic of a Ring, Some Non-Commutative Examples, Matrices over a field, The Quaternion's.

Sub – Rings, Ideals, Quotient Rings & Euclidean Rings: Ideals, Principal Ideal, Quotient Rings and Euclidean Rings.

Homomorphisms of Rings: Definition and Elementary properties, Maximal and Prime Ideals, Prime Fields.

Rings of Polynomials: Polynomials in an Indeterminate, The Evaluation Homomorphism's.

Factorization of Polynomials over a field: The Division Algorithm in $F[x]$; Irreducible polynomials, ideal structure in $F[x]$, Uniqueness of Factorization in $F[x]$.

Unit - X:

Vector Spaces: Vector Spaces, Subspaces, Linear Combinations and Systems of Linear Equations, Linear Dependence and Linear Independence, Bases and Dimension.

Linear Transformation and Matrices: Linear Transformations, Null spaces, and Ranges, The Matrix Representation of a Linear Transformation, Composition of Linear Transformations and Matrix Multiplication, Invariability and Isomorphism's.

Systems of linear Equations: Elementary Matrix operations and Elementary Matrices, The Rank of a Matrix and Matrix Inverses, Systems of Linear Equations:- Theoretical Aspects, Systems of Linear Equations - Computational Aspects.

Determinants: Determinants of order 2; Determinants of order n , Properties of Determinants.

Diagonalization: Eigen values and Eigen Vectors.

Inner Product Spaces: Inner Products and Norms, the Gram - Schmidt Orthogonalisation Process and Orthogonal Compliments, The Adjoint of a Linear Operator, Normal and Self - Adjoint Operators, Unitary and Orthogonal Operators and their Matrices.

FOR B.Sc (MATHEMATICS) GRADUATES

15.2 ANALYTICAL ABILITY

Unit –I:- Data Sufficiency:- A question is given followed by data in the form of two statements labeled as I and II. If the data given in I alone is sufficient to answer the question then choice (1) is the correct answer. If the data given in II alone is sufficient to answer the question, then choice (2) is the correct answer. If both I and II put together are sufficient to answer the question by neither statement alone is sufficient, then Choice (3) is the correct answer. If both I and II put together are not sufficient to answer the question and additional data is needed, then choice (4) is the correct answer.

Unit –II:-

a. Sequences and Series: Analogies of numbers and alphabets completion of blank spaces following the pattern in A: b:: C:d relationship odd thing out; Missing number in a sequence or a series.

b. Data Analysis: The data given in a Table, Graph, Bar Diagram, Pie Chart, Venn diagram or a passage is to be analyzed and the questions pertaining to the data are to be answered.

c. Coding and Decoding Problems: A code pattern of English Alphabet is given. A given word or a group of letters are to be coded and decoded based on the given code or codes.

d. Date, Time and Arrangement Problems: Calendar problems, Clock Problems, Blood Relationship, Arrivals, Departures and Schedules; Seating Arrangements, Symbol and Notation Interpretation.

FOR B.Sc (MATHEMATICS) GRADUATES
15.3. COMMUNICATIVE ENGLISH

1. GRAMMAR

Articles Prepositions Tenses Pronouns Concord Question Tags

2. VOCABULARY

Synonyms
Antonyms
One word Substitutes
Affixes
Homophones
Words often confused

3. ERROR ANALYSIS

Spotting Errors (Includes all the components mentioned in this syllabus)
Sentence Improvement

4. USAGE

Idioms, Phrasal verbs

5. READING COMPREHENSION

Main idea, Factual Questions Inferential Vocabulary

6. REARRANGEMENT OF PARTS IN SENTENCES (2 MARKS)

Jumbled parts of a sentence to be rearranged (Tests understanding of relation between form and function)

7. FUNCTIONAL ENGLISH

Requesting Complaining Seeking Permission Apologizing Suggesting
